

Table 6. Health insurance coverage of the civilian noninstitutionalized population: For the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2002

Individual (Non-group) Health Insurance Policies	Policyholders ^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	5.951	3,111	2,449
Single Policyholders	4.145	2,531	1,913
Family Policyholders	1.806	4,442	4,227

Table F. Health insurance coverage of the civilian noninstitutionalized population: Standard errors for the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2002

Individual (Non-group) Health Insurance Policies	Policyholders ^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	0.291	124	82
Single Policyholders	0.238	151	144
Family Policyholders	0.144	174	234

^aPolicyholder age: 0-64

^bIndividual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

^cThe table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
