Table 6. Health insurance coverage of the civilian noninstitutionalized population: For the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2003

Individual (Non-group) Health Insurance Policies	Policyholders ^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	6.466	3,284	2,566
Single Policyholders	4.509	2,657	1,964
Family Policyholders	1.958	4,728	4,323

Table F. Health insurance coverage of the civilian noninstitutionalized population: Standard errors for the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2003

Individual (Non-group) Health Insurance Policies	Policyholders ^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	0.380	139	98
Single Policyholders	0.308	162	155
Family Policyholders	0.193	208	151

^aPolicyholder age: 0-64

Source: Center for Financing, Access, and Cost Trends, Agency for Healthcare Research and Quality: Medical Expenditure Panel Survey Household Component, 2003

bIndividual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

^cThe table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
