Table 6. Health insurance coverage of the civilian noninstitutionalized population: For the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2005

| Individual (Non-group) Health Insurance Policies | Policyholders ^c (millions) | Mean premium cost (dollars) | Median premium cost (dollars) |
|---|--|--------------------------------|----------------------------------|
| All Policyholders | 5.956 | 3,664 | 2,692 |
| Single Policyholders | 4.149 | 2,835 | 1,864 |
| Family Policyholders | 1.807 | 5,568 | 3,895 |

Table F. Health insurance coverage of the civilian noninstitutionalized population: Standard errors for the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2005

| Individual (Non-group) Health Insurance Policies | Policyholders ^c (millions) | Mean premium cost (dollars) | Median premium cost (dollars) |
|---|--|--------------------------------|----------------------------------|
| All Policyholders | 0.394 | 208 | 166 |
| Single Policyholders | 0.320 | 177 | 190 |
| Family Policyholders | 0.188 | 513 | 397 |

^aPolicyholder age: 0-64

Source: Center for Financing, Access, and Cost Trends, Agency for Healthcare Research and Quality: Medical Expenditure Panel Survey Household Component, 2005

bIndividual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

^cThe table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
