insurance, total number, and mean, median premium cost, United States, 2009**

<b>Individual (Non-group) Health Insurance Policies</b>	<b>Policies<sup>c</sup> (millions)</b>	<b>Mean premium cost (dollars)</b>	<b>Median premium cost (dollars)</b>
<b>All Policyholders</b>	0.397	198	219
<b>Single Policyholders</b>	0.327	195	170
<b>Family Policyholders</b>	0.164	400	422

<sup>a</sup> Policyholder age: 0-64

<sup>b</sup> Individual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

<sup>c</sup> The table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
