- If coming from PP290 display "had a visit to someone who practices alternative care"
- If coming from PP300 display "received care at home"
- If coming from PP310 display "had a visit to any type of residential rehabilitation facility or treatment facility"

**LOOP\_10**      **(EE1015)**      **Item Type:** Route      **Type Class:** Begin Loop

---

**Route Details:**      For each element in the RU-Members-Roster, Ask LOOP\_20-END\_LP10.

Loop definition: LOOP\_10 cycles on persons who were selected as having an event for the provider probe that launched this instance of the EE section. This loop cycles on RU members who meet the following conditions:

If EE section launched from first cycle through provider probes (PP10-PP160\_01-PP160\_N) then  
-Person marked as '1' (YES) for the probe that launched this instance of the EE section.  
OR  
-Person selected at PP160\_01-PP160\_N grid as '1' (YES).

If EE section launched from second cycle through Provider Probes (PP170-PP320\_01-320\_N, PP325\_01-PP325\_N), then  
-Person selected at the probe that launched this instance of the EE section  
OR  
-Person selected at EE10.

NOTE: If the respondent is eligible for this loop, CAPI should cycle on the respondent first, followed by eligible RU members in PID order.

**LOOP\_20**      **(EE1020)**      **Item Type:** Route      **Type Class:** Begin Loop

---

**Route Details:**      For each of the following:  
EVENT 1  
EVENT 2  
EVENT 3  
EVENT 4  
EVENT N  
Ask BOX\_20-END\_LP20.

Loop definition: LOOP\_20 enumerates each event of this Provider Probes type for this person. The response to EE30 determines if the loop cycles again. If EE30 is coded '1' (YES), the loop cycles to collect the next event. When EE30 is coded '2' (NO), 'RF' (REFUSED), 'DK' (DON'T KNOW), the loop ends.

**BOX\_20**      **(EE1025)**      **Item Type:** Route      **Type Class:** If Then

---
