Table 1. Events, charges, and expenses for health care services and supplies, by event type: United States, 1997

| Event type | Events (in millions) | Charges (in billions) | Payments (in billions) | Percent distribution |
|------------------------------------|----------------------|-----------------------|------------------------|----------------------|
| Total ^a | NA | NA | \$553.2 | 100.0 |
| Hospital inpatient ^b | 26.5 | 388.8 | 209.4 | 37.9 |
| Ambulatory ^c | 1,346.3 | 300.4 | 181.3 | 32.8 |
| Prescription Medicine ^d | 1,873.7 | NA | 72.3 | 13.1 |
| Dental ^e | 286.9 | 50.7 | 44.5 | 8.0 |
| Home health ^f | NA | 40.0 | 29.2 | 5.3 |
| Other medical ^g | NA | 17.7 | 16.6 | 3.0 |

^aTotal includes inpatient hospital and physician services, ambulatory physician and nonphysician services, prescribed medicines, home health services, dental services, and various other medical equipment, supplies, and services that were purchased or rented during the year. Over-the-counter medications, alternative care services and phone contacts are excluded.

^cEvents and expenses for both physician and nonphysician medical providers seen in office-based settings or clinics, hospital outpatient departments, emergency rooms (except visits resulting in an overnight hospital stay), and clinics owned and operated by hospitals are included, as are events and expenses for hospital admissions without an overnight stay.

^tExpenses for care provided by home health agencies and independent home health providers are included. Most home health expenses (88.1%) were for agency providers.

^gExpenses for glasses, ambulance services, orthopedic items, hearing devices, prostheses, bathroom aids, medical equipment, disposable supplies, and other miscellaneous items or services that were obtained, purchased, or rented during the year are included. NA - not available

Note: These estimates are for a target population of approximately 271.3 million persons who were in the civilian noninstitutionalized population for all or part of 1997. Percents may not add to 100 because of rounding.

^bHospital admissions that did not involve an overnight stay are excluded but are counted as ambulatory events. Expenses include room and board and all hospital diagnostic and laboratory expenses associated with the basic facility charge, payments for separately billed physician inpatient services, and emergency room expenses incurred immediately prior to inpatient stays. Events for newborns who left the hospital on the same day as the mother are not treated as separate events, but associated expenses are included in expense estimates.

^dAll prescribed medicines initially purchased or otherwise obtained during 1997, as well as refills and free samples, are included. ^eServices provided by general dentists, dental hygienists, dental technicians, dental surgeons, orthodontists, endodontists, and periodontists are included.

Table A. Standard errors for events, charges, and expenditures by event type, United States, 1997. Corresponds to Table 1.

^aInpatient hospital and physician services, ambulatory physician and nonphysician services, prescribed medicines, home health services, dental services, and various other medical equipment and services that were purchased or rented during the year are included. Over-the-counter medications, alternative care services, and telephone contacts are excluded.

Note: These estimates are for a target population of approximately 271.3 million persons who were in the civilian noninstitutionalized population for all or part of 1997. Percents may not add to 100 because of rounding.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

^cOther public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

^dOther includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

Number of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPUS or CHAMPUS are classified as having insurance.

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

^{*}Relative standard error equal to or greater than 30 percent.

^aRoom and board and all hospital diagnostic and laboratory expenses associated with the basic facility charge, payments for separately billed physician inpatient services, and emergency room expenses incurred immediately prior to inpatient stays are included. Expenses for hospital discharges that did not involve an overnight stay, which are included as ambulatory expenses (Table 4), are excluded. Expenses for newborns who left the hospital on the same day as the mother are included in the mother's record.

^cOther public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

Other includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

Note: These estimates are for a target population of approximately 271.3 million persons who were in the civilian noninstitutionalized population for all or part of 1997. Percents may not add to 100 because of rounding.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

Number of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

⁻⁻ Less than 100 sample cases with expenses.

^{*}Relative standard error equal to or greater than 30 percent.

Table C. Standard errors for hospital inpatient services^a: median and mean expenditures per person with expense and distribution of expenditures by source of payment, U.S., 1997. Corresponds to Table 3.

^aExpenses for visits to medical providers seen in office-based settings or clinics, hospital outpatient departments, emergency rooms (except visits resulting in an overnight hospital stay), and clinics owned and operated by hospitals, as well as expenses for events reported as hospital admissions without an overnight stay, are included.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

^cOther public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

Other includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

Number of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

^{*}Relative standard error equal to or greater than 30 percent.

Table D. Standard errors for ambulatory services^a: median and mean expenditures per person with expense and distribution of expenditures by source of payment, U.S., 1997. Corresponds to Table 4.

^aExpenses for all prescribed medicines initially purchased or otherwise obtained during 1997, as well as any refills, are included. Free samples are included in the estimate of percent of persons with any expense.

Note: These estimates are for a target population of approximately 271.3 million persons who were in the civilian noninstitutionalized population for all or

part of 1997. Percents may not add to 100 because of rounding.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

Cother public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

dither includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

enumber of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

^{*}Relative standard error equal to or greater than 30 percent.

^aExpenses from any type of dental care providers are included.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

Other public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

program at any time during the year).

dOther includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

enumber of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

insurance and those with CHAMPUS or CHAMPUS (Armed-Forces-related coverage) are classified as having insurance.

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

[†] Standard error approximately zero because of poststratification to Census Bureau population control tables

⁻⁻ Less than 100 sample cases with expenses.

^aExpenses for eyeglasses, ambulance services, orthopedic items, hearing devices, prostheses, bathroom aids, medical equipment, disposable supplies, alterations/modifications, and other miscellaneous items or services that were obtained, purchased, or rented during the year are included. About half the expenditures in this category were for vision items.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

^cOther public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

Program at any time during the year).

d'Other includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

Number of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

⁻⁻ Less than 100 sample cases with expenses.

^{*}Relative standard error equal to or greater than 30 percent.

Table H. Standard errors for other medical equipment and services^a: median and mean expenditures per person with expense and distribution of expenditures by source of payment, U.S., 1997. Corresponds to Table 8

^aExpenses for eyeglasses, ambulance services, orthopedic items, hearing devices, prostheses, bathroom aids, medical equipment, disposable supplies, alterations/modifications, and other miscellaneous items or services that were obtained, purchased, or rented during the year are included. About half the expenditures in this category were for vision items.

^bPrivate insurance includes CHAMPUS and CHAMPVA (Armed-Forces-related coverage).

Note: These estimates are for a target population of approximately 271.3 million persons who were in the civilian noninstitutionalized population for all or part of 1997. Percents may not add to 100 because of rounding.

^cOther public programs include Department of Veterans Affairs (except CHAMPVA); other Federal sources (Indian Health Service, military treatment facilities, and other care provided by the Federal Government); other State and local sources (community and neighborhood clinics, State and local health departments, and State programs other than Medicaid); and other public (Medicaid payments reported for persons who were not enrolled in the Medicaid program at any time during the year).

Other includes Worker's Compensation; other unclassified sources (e.g., automobile, homeowner's, liability, and other miscellaneous or unknown sources); and other private insurance (any type of private insurance payments reported for persons without private health insurance coverage during the year, as defined in MEPS).

Number of persons and amount of expenses do not add to overall total because data on this variable were not available for some sample persons.

¹Uninsured refers to persons uninsured during the entire year. Public and private health insurance categories refer to individuals with public or private insurance at any time during the period; individuals with both public and private insurance and those with CHAMPUS or CHAMPVA (Armed-Forces-related coverage) are classified as having insurance.

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200

⁹Poor refers to incomes below the Federal poverty line; near poor, over the poverty line through 125 percent of the poverty line; low income, over 125 percent through 200 percent of the poverty line; middle income, over 200 percent to 400 percent of the poverty line; and high income, over 400 percent of the poverty line.

 $^{\ \, \}dagger \, \, \text{Standard error approximately zero because of poststratification to Census Bureau population control tables}$

⁻⁻ Less than 100 sample cases with expenses.
