9. Section HB
10. Section HC
1.0 **General Structure of the Health Status Instrument: Sections, Timepoints, and Reference Periods**

The overall objectives of the Health Status instrument across rounds are:

- To collect health status measures at two points in time for each SP:
  - **Baseline** which contains an extensive set of measures to be administered at the beginning of the reference year or admission, and
  - **Time 2** which consists of a shorter set of followup measures for the end of the year or (for admissions) 3 months after admission; and

- To collect data on incident conditions and to collect missing data on diagnoses for acute inpatient hospital stays (entered in the Residence History instrument) throughout the SP’s residence in eligible long term care institutions during the reference year (1996).

The instrument consists of 3 sections -- HA, HB, and HC.

- Section HA begins with a flow box that specifies the SPs for whom Section HA is appropriate, continues with the record identification items, and concludes with the questions from what was known as Battery A and Battery C from the pretest (minus the items on hospital stays and incident conditions).

- HA is followed by Section HB, the items on Incident Conditions and Hospital Stays. All paths through the Health Status instrument include HB.

- Section HC is a closing section for Health Status. It includes instructions for collecting Community Respondent Roster information in Rounds 2 and 3; two methodological items about abstracting; and a closing screen.

For current residents the Baseline and Time 2 points in time are 1/1/96 and 12/31/96; for first admissions, they are Key Admission Date (KAD) and 90 days after KAD. Baseline is always asked in the round and facility in which the SP is sampled; Time 2 is asked in Round 2 or 3, depending on the date of the interview, the SP’s vital status and place of residence; Section HB is asked in every round for all SP Types as long as the SP continues to reside in an eligible long term care place; and Section HC concludes every Health Status instrument for all SP Types.

In the remainder of these general specifications for Health Status, we repeat the structure of the Navigation Specifications as a framework for reviewing the contents of the health status instrument for the various SP types across the rounds. The section ends with a table of the question items in the Health Status instrument.

CRs sampled in this facility are the only SP Type in Round 1, so in many ways this is the simplest flow through the Health Status instrument.

In general for CRs across the three rounds, we are interested in health status at 1/1/96 and 12/31/96. By definition, Round 1 CRs were in an eligible unit of the Sampled Facility on 1/1/96, so in Round 1 we administer:

- Section HA (Baseline) with 1/1/96 as the reference date.
- Section HB, collecting diagnoses for hospital stays -- if missing from residence history -- and capturing the occurrence of certain illnesses between 1/1/96 and the REFERENCE PERIOD END DATE. (For Rounds 1 and 2, the REF END DATE is defined in the Navigation and RH specifications as the date of interview, date of death, or date of most recent discharge from the eligible nursing units in the facility, whichever is earliest.)
- Section HC, the closing section.

1.2 Overview: Round 2

</tbody>
</table>

Round 2 covers three SP Types: CRs continuing in their original SFs, F2s receiving their first SF interview, and CRs receiving their first interviews in a facility other than where they were sampled (which could be another SF or an entirely new facility). SPs in this latter category are considered Transfer SPs. All Round 2 New Facilities (NF) receive the Facility Questionnaire to determine eligibility; eligible Round 2 NFs continue with full data collection as appropriate for the SP, while in ineligible Round 2 NFs we administer only the RH (i.e., there is no health status module).

In Health Status, for **CRs continuing in their original SFs**, we collect Section HA (Time 2: 12/31/96) if the Round 2 data show that the SP was in an eligible unit at the facility on 12/31/96; otherwise, the first flow box in Section HA routes the application to HB. Section HB is administered for the period between the Round 1 interview date and the REF END DATE, to collect data on incident conditions and to update diagnoses for hospital stays (if any stays were reported in RH, but diagnoses were not obtained). Then the box at the end of HB routes these SPs to HC for closing. Note that not all CRs continue from Round 1 to Round 2 for Health Status: if the Round 1 REF END DATE was prior to the Round 1 date of interview (in other words, if the SP had died or been discharged from the SF’s eligible units before the Round 1 interview and never readmitted), no HS instrument is administered in Round 2 or 3.

For **F2s in their original SFs**, Section HA (Baseline) is administered, to obtain baseline measures at KAD; Section HB is administered, to obtain incident condition and hospital stay diagnoses data since KAD; Section HA (T2) may be administered, to obtain data on health status at 90 days after KAD; and all get HC. HA (T2) will only be administered for these SPs in Round 2 if the RH data indicate the SP was residing in an eligible unit of the SF on KAD+90, and there have been 120 days or more between KAD and the date of the Round 2 interview. If 120 days have not yet occurred, Section HA (T2) will be postponed to Round 3. If the SP was residing in another eligible facility on KAD+90, Section HA (T2) will be administered at the Transfer Facility in Round 3; and if the SP was not residing in an eligible LTC place on KAD+90 (either because the SP had died, or had moved to a different type of place), the Time 2 measures will not be administered at all.
For CRs who had transferred to another eligible facility (according to the Round 1 RH data), the first box in HA routes to Section HB. HB is administered in the new facility to collect incident conditions and hospital diagnoses since TAD (the date of admission to the transfer facility). (The flow is from the beginning of HA -- before the record identification items - directly to HB.)

All SP Types end with Section HC.

</tbody>
</table>

In Round 3 we encounter the full range of facility and SP types. Round 2 NF eligibility was determined in Round 2. All Round 3 NFs receive the FQ to determine eligibility; eligible Round 3 NFs continue with full data collection as appropriate for the SP, while in ineligible Round 3 NFs we administer only the RH. Notice that Round 3 NFs include those facilities identified for the first time in either Round 2 or Round 3.

As in Rounds 1 and 2, the box at the beginning of HA determines whether HA is administered, and Section HC always closes the Health Status instrument for all SP Types in eligible facilities.

For CRs continuing in the facility in which they were sampled, if HA (T2) was not administered in Round 2, Section HA (T2) is administered. HA (T2) collects data for 12/31/96, if the SP resided in an eligible LTC unit of the facility on that date. HB collects data on incident conditions and hospital stay diagnoses missing from RH for the period between the Round 2 interview date and the REF END DATE. (In Round 3, the REF END DATE for HB is 12/31/96, the date of death, or date of most recent discharge from the eligible units in the facility, whichever date is earliest.)

For F2s continuing in the facility in which they were sampled, if HA (T2) was not administered in Round 2, and the SP was in the SF on KAD+90, it is administered in Round 3. Section HB is administered for the period between the Round 2 interview date and REF END DATE.

For F3s sampled in this facility, Section HA (Baseline) for KAD is administered for the period between KAD and REF END DATE. HA (T2) is administered if the SP resided in an eligible unit of the facility on KAD+90. Section HB is administered for the period between KAD and REF END DATE.

For CRs who are continuing residents of an eligible transfer facility, Sections HA (T2) and HB are administered. HA (T2) collects Time 2 data for 12/31/96, if the SP resided in an eligible LTC unit of the facility on that date. HB collects data on incident conditions and missing hospital stay diagnoses for the period between the Round 2 interview date and REF END DATE.

For CRs who are new transfers, Section HA (T2) is administered for 12/31/96, if the SP resided in an eligible LTC unit of the facility on that date. Section HB collects data on incident conditions and missing hospital stay diagnoses between TAD and REF END DATE.
For F2s and F3s who are new transfers, Section HA (T2) is administered if the SP resided in an eligible unit of the facility on KAD+90. Section HB collects data on incident conditions and hospital stay diagnoses between TAD and REF END DATE.

1.4 Overview: Record Identification Section

The Record Identification module consists of items to ascertain what records are available to use in collecting health status data and, if either the MDS or Quarterly Review is available, whether the form was completed close enough to the REF DATE to be eligible to use for collecting data for that timepoint.

HA (Baseline) items determine if an MDS or Quarterly Review is available with a valid assessment date in reference to the REF DATE specified for the SP. If so, the module confirms that the form is, in fact, the closest form available to the REF DATE and, thus, is designated as the primary form. In the case of CRs, if the closest form to the REF DATE is a Quarterly Review, the module then determines the assessment date for the closest MDS. If this MDS falls within a specified date range, the MDS becomes the backup form. This provides assessment dates for all forms that will be used in answering the health status questions. If an MDS or Quarterly Review is available, and designated the primary form, the module determines which version of the form the respondent will be using. If a backup form is being used, we will assume the backup is the same version as the primary form. Finally, the respondent is instructed on what form to use in answering the health status questions.

HA (T2) items follow a similar path to Baseline with two exceptions. For HA (T2), HA (Baseline) is reviewed to determine if an MDS or Quarterly Review was available for the Baseline timepoint. If so, the module determines whether another form is available dated after the assessment date of the HA (Baseline) form. Also, the record identification section tries to identify a backup MDS for all SP types if the Primary form is a Quarterly Review. From this point, HA (T2) follows the same path as HA (Baseline).

If there was no full MDS or Quarterly Review available for HA (Baseline) and Baseline was administered in the current round, the module goes directly to the introductory item for the health status questions. If Baseline was administered in a previous round and there was no MDS or Quarterly available, the respondent is taken through the initial questions to determine if there is an MDS or Quarterly available for Time 2.

1.5 Overview: Health Status Instrument Items

This section summarizes the key date ranges and primary paths through the Health Status instrument. The concepts of valid assessment date and REF DATE are defined for each SP type at Baseline and Time 2. Exhibit 1 presents a summary of the key date ranges and the reference dates used in the Health Status section.

Valid Assessment Date

CAPI determines the Closest Valid Assessment Date (CVAD) from assessment dates on the MDS forms listed by the respondent (HA3A/HA3B). A CVAD is established for each time period. The CVAD for baseline is labeled the BCVAD; the CVAD for Time 2 is labeled the TCVAD.

Ranges for determining the validity of the assessment dates for MDS forms are displayed below. Only a form with a valid assessment date is eligible to be the primary form for health status data collection.

<table>
<thead>
<tr>
<th>Timepoint</th>
<th>CR</th>
<th>VALID ASSESSMENT DATE</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>F2</td>
<td>F3</td>
</tr>
<tr>
<td>Baseline</td>
<td>1/1/95 - 1/14/96</td>
<td>KAD - 7/14/96</td>
</tr>
<tr>
<td>Time 2</td>
<td>11/1/96 - 1/14/97</td>
<td>BCVAD+1/ KAD+30 - KAD+120</td>
</tr>
</tbody>
</table>

The extent to which missing data is allowed in an assessment date depends on the type of missing data. DAY may be missing if there is only one form available. If there are two or more forms completed in the same month and only one has
a DAY entry, the form(s) with no DAY entry is invalid. If no forms dated in the same month have a DAY entry, none are eligible to use as the primary form for data collection and the interviewer will ask the respondent to refer to the medical record (which includes the invalid MDS(s)) when giving information about the REF DATE. When there is conflicting information, the respondent should be told to use her best judgment about which is closer to the REF DATE.

Reference Dates

The dates to be used for REF DATE in the Health Status instrument are displayed below by SP type and by timepoint.

<table>
<thead>
<tr>
<th>Timepoint</th>
<th>REF DATE</th>
<th>F2/F3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline</td>
<td>1/1/96</td>
<td>KAD</td>
</tr>
<tr>

<td>12/31/96</td>
<td>KAD+90</td>
</tr>
</tbody>
</table>

Health Status Sections and Items By Round

The Health Status sections and the questions within each section are displayed in Tables 1 and 2. Table 1 displays all Health Status items and the rounds in which they are administered for each SP type. Table 2 displays the Health Status sections and the rounds in which they are administered by SP type as defined in residence history.

*The four SP types are described in detail in Residence History.
**For CRs, T2 is administered if SP was in an eligible unit of a facility on 12/31/96. For F2s, T2 is administered if SP was in an eligible unit of a facility on KAD+90 and KAD+120 > current round interview date. For F3s, T2 is administered if SP was in an eligible unit of the facility at KAD+90.
***If SP not readmitted, no health status data are collected.
SECTION HA

GENERAL INSTRUCTIONS

If no medical record is available (HA1^=1, or if MDS forms are unavailable (HA2 ^=1 or HA2B ^= 1), or if no valid MDS is identified in HA3A, HA3B, or HA7A, leave the section displays blank.

Display the appropriate MDS section fills, based on the attached table of MDS section letters by the NNHES Question Number, centered on the second line of the screen in reverse video.

If both a backup MDS and a Quarterly Review form are available, always display the MDS fills followed by the Quarterly Review fills. If only one form is available, display only the appropriate form set of fills. Identify the forms by a “M” or “Q” preceding the section fills. For MDS and Quarterly Review sections that are identified by a letter only, “SEC.” precedes the letter, e.g.,

Some MDS items require special identification for the MDS 1 Quarterly and for some individual states. Examples of those fills are as follows:

If a question item is not listed on the attached table as an MDS time, Display NOT ON MDS in reverse video on the top center portion of the screen.

In choice lists, "NONE CHECKED" or "NONE OF THE ABOVE" is allowed only if no other item is selected.

<table>

</table>

If this is the first time for this respondent in Section HA in this facility, go to HA1PRE1. Else, go to HA1PRE2.

RECORD IDENTIFICATION

The next questions are about {SP}'s health status on or around (REF DATE). We have found that much of the data we are collecting is usually located in the resident's full Minimum Data Set (MDS) assessments, the Quarterly Review forms, and other medical chart notes. I am prepared to abstract from the medical record and MDS forms myself. But I’d rather ask you the questions as you review the medical charts. Do you have any preference?

PAUSE FOR RESPONSE.

IF R PREFERS THAT YOU ABSTRACT, READ:

(Please take a moment to locate the records now and confirm they are the records closest to (REF DATE). Although I believe I can abstract most of the data, I may need to call someone if I have questions.)

PRESS ENTER TO CONTINUE.

<tr>
<td>F2  KAD - 7/14/96</td>
<td>BCVAD+1/KAD+30 - KAD+120</td>
</tr>
<tr>
<td>F3  KAD - 1/14/97</td>
<td>BCVAD+1/KAD+30 - KAD+120</td>
</tr>
</tbody>
</table>
   
   And,
   If year is not missing, and
   If F2 or F3, month is not missing.
2. If date is valid, set a flag and go to Box HA6.
3. If date is invalid, go to HA5.

BOX HA6
Obtain state name from Facility’s address. If (Rd=1 and state name is KS, ME, MS,
   NY, OH, SD, TX, and WV (states that use full MDS assessments for Quarterly
   Reviews) or (Rd=2 or Rd=3 and state name is MS or SD), set HA4=1 and go to
   HA5. Else, go to HA4.

HA4
Obtain state name from Facility Address. Then apply the following algorithm.

If Rd=1 and state name is
   Then display as FULL MDS SECTION:
   SC  G. PSYCHOSOCIAL WELL-BEING
   CO  Q. PSYCHOSOCIAL WELL-BEING
   All other rounds and states  D. VISION

Form Type phrases are not affected by MDS version.

RECORD IDENTIFICATION

HA4

Please tell me if the form with the assessment date of {LAST ASSESSMENT DATE ENTRY IN HA3A/HA3B}
contains the following section:
   {FULL MDS SECTION}

   YES (FULL MDS) ................................. 1
   NO (QUARTERLY REVIEW) .......................... 0
   DK ............................................ -8
   RF ............................................ -7

(HSC2)

PROGRAMMER SPECS:
Set a flag to indicate assessment type form. If HA4 = DK (-8) or RF (-7) and if there is more than one form, set
assessment form type flag to 1 (FULL MDS).
BOX HA7

Compare most recent Assessment Date with REF DATE. If number of days between Assessment Date and REF DATE > 7, or if day only in HA3A or HA3B is DK or RF, continue.
Else, go to BOX HA9.

HA5
Display last assessment date entry in HA3A/HA3B above question text.
If CR or if Time 2 and F2 or F3, display "or Quarterly Review".
Fill "ASSESSMENT DATE" with last assessment date entry in HA3A/HA3B.
If CR Baseline, display "closer to (REF. DATE) but before (REF. DATE + 14)."
Else, display "closer to (REF. DATE)."

RECORD IDENTIFICATION
{ASSESSMENT DATE: {ASSESSMENT DATE}}

 Besides the form you just told me about, does {SP’s} medical record contain any other MDS form (or Quarterly Review form) dated closer to (REF DATE) (but before (REF. DATE + 14)).

YES .................................................. 1
NO .................................................. 0
DK .................................................. -8
RF .................................................. -7

BOX HA8
If another form is available (HA5 = 1 (YES)),
If Baseline go to HA3A.
If Time 2, go to HA3B.
Else, go to BOX HA9.
1. If one assessment date in HA3A/HA3B and FORM TYPE is Full MDS and assessment date is valid, set a flag in to indicate this is the BCVAD/TCVAD and go to HA6.
2. If only one assessment date in HA3A/HA3B and FORM TYPE is Quarterly Review and assessment date is valid, set a flag to indicate this date is the BCVAD/TCVAD and go to HA7A.
3. If no assessment dates are valid or one form and form type is unknown, treat as having no MDS or Quarterly Review and go to HA9PRE.
4. If more than 1 valid assessment date (2 or more flags set to valid in BOX HA5), go to step 4a. to determine which assessment date is the BCVAD/TCVAD.
   4a. If all dates have valid entries in the DAY, MONTH and YEAR fields and form type is known, select the date which is closest to REF DATE as the BCVAD/TCVAD.
   4b. If at least one of the dates does not have valid entries in DAY or MONTH or form type is unknown, consider only the dates and form types with complete information in determining BCVAD/TCVAD.
   4c. If two dates are equally close to REF DATE, select the date before REF DATE as the BCVAD/TCVAD.
5. If Form Type in HA4 for BCVAD/TCVAD identified in step 4 is a full MDS assessment, go to HA6. If Quarterly Review, go to step 6.
6. Review HA3A/HA3B and Box HA5; if any of the valid dates are for a full MDS form (HA4 = Full MDS), select the full MDS as the Backup MDS and go to HA7C. If more than one full MDS with a valid date, select the date closest to the REF DATE as the Backup MDS and go to HA7C. Else (no valid dates in HA3A/HA3B), go to step 7.
7. If no additional dates collected in HA3A/HA3B, go to HA7A.
8. If only one additional date in HA3A/HA3B and it is an MDS, go to BOX HA10.
9. If HA3A/HA3B contains more than one full MDS assessment date, determine which assessment date is the closest to the REF DATE. If two or more dates are equally close to REF DATE, select the full MDS form dated before REF DATE, then go to BOX HA10.
Display BCVAD/TCVAD as {ASSESSMENT DATE} above question text.
Suppress "full" and display "QUARTERLY REVIEW .... 5 (HA7C)" if (Rd=1 and state name is KS, ME, MS, NY, OH, SD, TX, and WV (states that use full MDS assessments for quarterly reviews) or (Rd=2 or Rd=3 and state name is MS or SD).

And:
If year is not missing, and
If F2 or F3, month is not missing.

If date is valid, set a flag to indicate it is the backup MDS date.
Then, go to HA7C.

Abbreviations:
BCVAD = Baseline Closest Valid Assessment Date
DOI = Date of Interview
DOB = Date of Birth
If HA3A/HA3B contains a valid date, for "FORM TYPE," display category text from HA4 for form with closest valid assessment date.
If FORM TYPE=0 (QUARTERLY REVIEW) and there is a valid Backup MDS Assessment Date from BOX HA10 display "If the information is not found on the Quarterly Review, please refer to the full MDS form with the assessment date of {BACKUP MDS ASSESSMENT DATE} to answer the question. Else, display "If the information is not found on the Quarterly Review, please refer to {SP}'s medical record to answer the questions."

**RECORD IDENTIFICATION**

HA7C

Please refer to the (FORM TYPE) with the assessment date of (CLOSEST VALID ASSESSMENT DATE) when answering the following questions. (If the information is not found on the Quarterly Review, please refer to the full MDS form with the assessment date of (BACK MDS ASSESSMENT DATE)/please refer to {SP}'s medical record) to answer the questions.)
HA8
Obtain state name from Facility’s address. Then refer to MDS Version Table and apply the following algorithm.

1. If state name is CO, display
   "SECTION LETTER" = E
   "VERSION 1 PHRASE" = VERSION 1: E. COGNITIVE PATTERNS
   "VERSION 2 PHRASE" = VERSION 2: E. MOOD AND BEHAVIOR PATTERNS

2. If state name is KS or TX, display
   "SECTION LETTER" = G
   "VERSION 1 PHRASE" = VERSION 1: G. ACTIVITY PURSUIT PATTERNS
   "VERSION 2 PHRASE" = VERSION 2: G. PHYSICAL FUNCTIONING AND STRUCTURAL PROBLEMS

3. If state name is ME, MS, NE, NY, OH, SD, VT, or WV, display
   "SECTION LETTER" = H
   "VERSION 1 PHRASE" = VERSION 1: H. PHYSICAL FUNCTIONING AND STRUCTURAL PROBLEMS
   "VERSION 2 PHRASE" = VERSION 2: H. CONTINENCE IN LAST 14 DAYS

4. All other states, display (states using MDS Version 1 in 1995 and MDS Version 2 in 1996), display
   "SECTION LETTER" = E
   "VERSION 1 PHRASE" = VERSION 1: E. PHYSICAL FUNCTIONING AND STRUCTURAL PROBLEMS
   "VERSION 2 PHRASE" = VERSION 2: E. MOOD AND BEHAVIOR PATTERNS

RECORD IDENTIFICATION

(CVAD ASSESSMENT FORM TYPE) ASSESSMENT DATE: (CVAD)

First, I need to know the MDS version you will be using. Is it Version 1 or Version 2? (Please turn to Section (SECTION LETTER) and tell me the name of the section.)

   VERSION 1 (VERSION 1 PHRASE) . . . . . . . . . . . . . . . . . 1
   VERSION 2 (VERSION 2 PHRASE) . . . . . . . . . . . . . . . . . 2
   OTHER (SPECIFY:________________) . . . . . . . . . . . . . . 91

PROGRAMMER SPECS:
Set a flag to indicate MDS version number. If HA8 = 91, -8 (DON’T KNOW), or -7 (REFUSED), set MDS version flag to 1 (MDS version 1).

Refer to MDS Mapping Table. Use version name (MDS V.1, MDS V.2, MDS+ V.90, OR MDS+ V.92) and section letters corresponding to the MDS version the facility is using for VERSION:SECTION fill in headers in subsequent questions.
HA9PRE
For 1st sentence, if SP type=CR, display "REF DATE";
Else, if SP type=F2 or F3 for T2, display "REF DATE";
Else, if SP type=F2 or F3 for Baseline, display "(his/her) admission to the facility".
For Baseline:
If no MDS available in medical record (HA2=NO, DK, or RF), display "Since you do not have an MDS to refer to, please refer to (SP’s) medical record.";
Else, if the medical record does contain an MDS (HA2=YES), but HA3A does not contain at least one form with a valid assessment date (HA3A=SHIFT/5 (-5), DK, or RF) or a known form type, display "Since I will be collecting information about (SP) on or around (REF DATE), and there is no MDS or Quarterly Review available close to that date, please refer to (SP)’s medical record for the information.";
Else, if no medical record is available (HA1=NO, DK, or RF) in this round, display "Since you do not have a medical record at hand for reference, please think about the information found in (SP)’s medical record.";
Else, do not display 2nd sentence.
For T2,
If no MDS available in medical record (HA2 or HA2B=NO, DK, or RF), display "Since you do not have an MDS to refer to, please refer to (SP)’s medical record.";
Else, if the medical record does contain a MDS (HA2 or HS2B=YES), but HA3B does not contain at least one form with a valid assessment date (HA3B=SHIFT/5 (-5), DK, or RF) or a known form type, display "Since I will be collecting information about (SP) on or around (REF DATE), and there is no MDS or Quarterly Review available close to that date, please refer to (SP)’s medical record for the information.";
Else, if no medical record is available (HA1=NO, DK, RF) in this round, display "Since you do not have a medical record at hand for reference, please think about the information found in (SP)’s medical record.";
Else, do not display 2nd sentence.

MENTAL HEALTH (MR/DD)

HA9PRE
Now I have some questions concerning (SP)’s health on or around the (REF DATE/(his/her) admission to the facility). ((Since you do not have an MDS to refer to, please refer to (SP)’s medical record/Since I will be collecting information about (SP) on or around (REF DATE) and there is no MDS or Quarterly Review available close to that date, please refer to (SP’s) medical record for the information./Since you do not have a medical record at hand for reference, please think about the information found in (SP)’s medical record) to answer these questions.)

PRESS ENTER TO CONTINUE.

If Time 2, go to BOX HA24.

**BOX HA19**

1. If no MDS Form (HA2 = NO, DK, RF or -1), go to BOX HA24.
2. If IN3 has a valid Medicaid number, and
   If IN15 (or IN15 in INMD in EX) has a valid Medicare number or Railroad Retirement Board number, and
   If IN26 has a valid Social Security,
   Go to Step 3. Else, go to HA44PRE.
3. If MDS version flag = 2, and
   If education level (BQ9) = -1, DK or RF, go to BOX HA23.
   Else, go to BOX HA24.

(Box HS13)
ID NUMBER TYPE:
Display ("PREFERRED" NAME FOR MEDICAID) {(or "ALLOWED FOR" NAME FOR MEDICAID)} given by matching the state of the facility’s address with a state in the table of State Medicaid Names included in the Facility Questionnaire specifications. Else, display {Medicare, Medicaid and Social Security} if SP’s Medicare number is missing (IN15 = -1, DK or RF) and if SP’s Medicaid number is missing (IN3 = -1, DK or RF) and if Social Security number is missing (IN26 = -1, RF or DK). Else, display {Medicare and Medicaid} if SP’s Medicare number is missing (IN15 = -1, DK or RF) and SP’s Medicaid number is missing (IN3 = -1, DK or RF). Else, display {Medicare and Social Security} if SP’s Medicare number is missing (IN15 = -1, DK or RF) and Social Security number is missing (IN26 = -1, RF or DK). Else, display {Medicare} if SP’s Medicare number is missing (IN15 = -1, DK or RF). Else, display Medicaid and Social Security if SP’s Medicaid number is missing (IN3 = -1, DK or RF) and Social Security number is missing (IN26 = -1, RF or DK). Else, display Medicaid if SP’s Medicaid number is missing (IN3 = -1, DK or RF). Else, display {Social Security} if SP’s Social Security number is missing (IN26 = -1, DK or RF).

Display {This information...(42 U.S.C. 299a-1(c))} only if this is the first Health Status Questionnaire interview with this respondent.

Note: Specifications for IN15 above include IN15 in INMD in EX.

This next section asks for {SP}'s {ID NUMBER TYPE} number(s) as recorded on the MDS assessment form. (This information is voluntary and is collected under the authority of Title IX, Section 902(a) of the Public Health Service Act (42 U.S.C. 299a). There will be no effect on {SP}'s benefits and no information will be given to any government or nongovernment agency other than the sponsoring agencies. We need this information to supplement data we will gather about {SP}'s insurance coverage, particularly under Medicare and {PREFERRED" NAME FOR MEDICAID} {(or "ALLOWED FOR" NAME FOR MEDICAID)} and to determine {SP}'s vital status after 1996. Information will be used for research purposes only; it will be held in the strictest confidence and will not be released to anyone without written consent in accordance with Sections 903(c) and 308(d) of the Public Health Service Act (42 U.S.C. 299a-1(c) and 242m(d)).)

PRESS ENTER TO CONTINUE.

If SP’s Medicare number is missing (IN15 (or IN15 in INMD in EX) = -1, DK or RF), go to HA44A. All others, go to BOX HA20.

(Box HS13A)

### HEALTH STATUS HELP SCREENS

**HA2**

A full MDS assessment is the form completed at admission and on an annual basis thereafter. A Quarterly Review is the shortest form which contains only a few of the full MDS assessment items.

**HA7A**

A full MDS assessment is the form completed at admission and on an annual basis thereafter.

**HA15**

0 INDEPENDENT - decisions consistent/reasonable  
1 MODIFIED INDEPENDENCE - some difficulty with new tasks or situations only  
2 MODERATELY IMPAIRED - decision poor; cues/supervision required  
3 SEVERELY IMPAIRED - never/rarely made decisions

**HA16**

0 HEARS ADEQUATELY - normal conversational speech, including telephone or watching TV  
1 MINIMAL DIFFICULTY - when not in a quiet setting  
2 HEARS IN SPECIAL SITUATIONS ONLY - speaker has to adjust tonal quality and speak distinctly  
3 HIGHLY IMPAIRED - absence of useful hearing

**HA18**

MAKING SELF UNDERSTOOD - expressing information content - however able  
0 UNDERSTOOD - expressed ideas clearly  
1 USUALLY UNDERSTOOD - difficulty finding words or finishing thoughts  
2 SOMETIMES UNDERSTOOD - ability limited to making concrete requests  
3 RARELY OR NEVER UNDERSTOOD - ability to understand the SP is limited to staff interpretation

**HA19**

ABILITY TO UNDERSTAND OTHERS - understanding verbal information content  
0 UNDERSTAND - clearly comprehends the speaker’s message  
1 USUALLY UNDERSTANDS - may miss some part/intent of message  
2 SOMETIMES UNDERSTANDS - simple direct communication  
3 RARELY OR NEVER UNDERSTANDS - very limited ability to understand communication

### HA21

A. **WANDERING** - moved with no rational purpose, seemingly oblivious to needs or safety

B. **VERBALLY ABUSIVE BEHAVIOR** - others were threatened, screamed at, cursed at

C. **PHYSICALLY ABUSIVE BEHAVIOR** - others were hit, shoved, scratched, sexually abused

D. **SOCIALLY INAPPROPRIATE/DISRUPTIVE BEHAVIOR** - made disruptive sounds, noisiness, screaming, self-abusive acts, sexual behavior or disrobing in public, smeared/threw food/feces, hoarding, rummaging through others’ belongings

E. **RESISTANCE TO CARE** - resisted taking medications/injections, ADL assistance, or eating
# HEALTH STATUS HELP SCREENS

HA22

<table>
<thead>
<tr>
<th>A</th>
<th>TRANSFER - how resident moves between surfaces - to/from: bed, chair, wheelchair, standing position (EXCLUDE to/from bath/toilet)</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>LOCOMOTION ON THE UNIT - how resident moves between locations in his/her room and adjacent corridor on same floor. If in wheelchair, self-sufficiency once in chair</td>
</tr>
<tr>
<td>C</td>
<td>DRESSING - how resident puts on, fastens, and takes off all items of street clothing, including donning/removing prosthesis</td>
</tr>
<tr>
<td>D</td>
<td>EATING - how resident eats and drinks (regardless of skill)</td>
</tr>
<tr>
<td>E</td>
<td>TOILET USE - how resident uses the toilet room (or commode, bedpan, urinal); transfer on/off toilet, cleanses, changes pad, manages ostomy or catheter, adjusts clothes</td>
</tr>
</tbody>
</table>

- 0 INDEPENDENT - no help or oversight or help/oversight provided only once or twice a week
1 SUPERVISION - oversight, encouragement or cueing provided only once or twice a week
2 LIMITED ASSISTANCE - highly involved in activity; received physical help in guided maneuvering of limbs or other non-weight bearing assistance three or more times OR more help provided only 1 or 2 times a week
3 EXTENSIVE ASSISTANCE - performed part of the activity with help of the following type(s) provided 3 or more times a week: weight bearing support or full staff performance of task during part (but not all) of the time
4 TOTAL DEPENDENCE - full staff performance of activity
8 ACTIVITY DID NOT OCCUR

HA23

| bathings - how resident takes full-body bath/shower, sponge bath, and transfers in/out of tub/shower (EXCLUDE washing of back and hair) |
|---|-----------------------------------------------------------------------------------------------------------------|
| 0 | INDEPENDENT - no help provided |
1 | SUPERVISION - oversight help only |
2 | PHYSICAL HELP LIMITED TO TRANSFER ONLY |
3 | PHYSICAL HELP IN PART OF BATHING ACTIVITY |
4 | TOTAL DEPENDENCE |
8 | ACTIVITY DID NOT OCCUR |

HA24

| CANE/WALKER - includes residents who walk by pushing a wheelchair for support |
|---|-----------------------------------------------------------------------------|
| WHEELED SELF - includes using a hand-propelled or motorized wheelchair, as long as resident takes responsibility for own mobility, even for part of the time |
HEALTH STATUS HELP SCREENS

HA25
BOWEL CONTINENCE - control of bowel movement, with appliance or bowel
continence programs, if employed

- 0 CONTINENT - complete control (includes use of ostomy device that
does not leak stool)
1 USUALLY CONTINENT - incontinent episodes less than weekly
2 OCCASIONALLY INCONTINENT - once a week
3 FREQUENTLY INCONTINENT - 2-3 times a week
4 INCONTINENT - all (or almost all) of the time

HA26
BLADDER CONTINENCE - control of urinary bladder function (if dribbles,
volume insufficient to soak through underpants), with appliances
or continence programs, if employed

- 0 CONTINENT - complete control (includes use of indwelling urinary
catheter or ostomy device that does not leak urine)
1 USUALLY CONTINENT - incontinent episodes once a week or less
2 OCCASIONALLY INCONTINENT - two or more times a week but not daily
3 FREQUENTLY INCONTINENT - tended to be incontinent daily but some
control present (eg, day shift)
4 INCONTINENT - had inadequate control; multiple daily episodes

HA32
Active refers to those diseases associated with the resident’s ADL
status, cognition, behavior, medical treatments, or risk of death.

HA34
DEHYDRATION - the condition that occurs when fluid output exceeds
fluid intake

HA35
DELUSIONS - the resident has fixed (false) ideas not shared by others

HA36
HALLUCINATIONS - the resident behaves as if he/she sees, hears, smells,
or tastes things others do not
HA41

PRESSURE ULCER - any lesion caused by pressure resulting in damage of underlying tissue
