Version 1.1

ASSURANCE OF CONFIDENTIALITY

Information contained on this form that would permit identification of any individual or establishment is collected with a guarantee that it will be held in strict confidence by the contractor and AHCPR, will be used only for purposes stated in this study, and will not be disclosed or released to anyone other than authorized staff of AHCPR without the consent of the individual or the establishment in accordance with Section 903(c) of the Public Health Service Act (42 U.S.C. 299a-1(c)).
PLACE ROSTER

The Place Roster is a list (at the facility level) of all places that are mentioned in the Facility Questionnaire and the SP-level questionnaires in all rounds. At the beginning of Round 1, it is initialized with the FACILITY name. The Locator Code is set as NEW FACILITY, Status is set to ELIGIBLE, and Place Type is set to ELIGIBLE LTC. Locator code and status are flags. (For Place Roster displays, only the name and place type are shown in text.)

- The NNHES status categories are ELIGIBLE, INELIGIBLE, and ON NHPI. (See BOX FA12, p. 38.) When a place’s NNHES status has been determined as ELIGIBLE, an asterisk should be placed immediately to the left of that place, designating that .NNHESSTAT is ELIGIBLE.

- The NNHES locator codes for sampled facilities are:
  1. NEW FACILITY
  2. NEW FACILITY, PART OF LARGER FACILITY
  3. NEW FACILITY AND LARGER FACILITY
  4. LARGER FACILITY
  5. PART OF LARGER FACILITY
  6. PART OF NEW FACILITY
  7. OTHER

For place type categories, see BOX FA11 (p. 36).

Three levels of potential interest are pinpointed in the Facility-level Questionnaire: the eligible long-term care place, the larger place it is part of, and the parts within the long-term care place.

The Place Roster arrays these three levels in a hierarchy. First is the LARGER FACILITY (if any), followed by all the parts whose NNHES statuses are ineligible. Next is the NEW FACILITY, followed by the parts within it -- first those that are eligible, followed by any that are ineligible. (The NEW FACILITY may itself be a larger facility, with nursing units contained within; each nursing unit may have special units within it. But we don’t expect or allow more than one LARGER FACILITY per case.)

The nesting units within a larger facility are indented under the largest entity. For example, if the larger facility is a CCRC, then the Place Roster will display:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>PLACE TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCRC</td>
<td>INELIG LTC</td>
</tr>
<tr>
<td>Nursing Unit</td>
<td>ELIG LTC</td>
</tr>
<tr>
<td>Assisted Living Unit</td>
<td>INELIG LTC</td>
</tr>
<tr>
<td>Residential Units</td>
<td>COMMUNITY</td>
</tr>
<tr>
<td>Riverside Hospital</td>
<td>HOSPITAL</td>
</tr>
</tbody>
</table>

If there are special care units within an eligible long-term care unit, they will be nested within the nursing unit on the Place Roster. An example below:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>PLACE TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCRC</td>
<td>INELIG LTC</td>
</tr>
<tr>
<td>Nursing Unit</td>
<td>ELIG LTC</td>
</tr>
<tr>
<td>General Population Unit</td>
<td>ELIG LTC</td>
</tr>
<tr>
<td>Alzheimer Unit</td>
<td>ELIG LTC</td>
</tr>
<tr>
<td>Assisted Living Unit</td>
<td>INELIG LTC</td>
</tr>
<tr>
<td>Residential Units</td>
<td>COMMUNITY</td>
</tr>
<tr>
<td>Riverside Hospital</td>
<td>HOSPITAL</td>
</tr>
</tbody>
</table>
Additions to the Place Roster from the SP-level questionnaires are placed after the parts of the NEW FACILITY. HOSPITALS precede other PLACE TYPES. Order by ascending code (following the code structure of FA6, p. 22). For other place types, order by ascending code (following the code structure of FA12, p. 26).

In the SP-level questionnaires, any unit can be selected. However, if the interviewer selects the CCRC in the first example, or the CCRC or the nursing unit in the second example, we will display a soft range error message that asks the interviewer to verify the selection. If the selection passes the soft range message, we will use the place type for the selection in the instrument section. We want to give interviewers flexibility if their respondent cannot give the detailed unit we have mapped out. We are thinking about using color to indicate which units could be selected.

**Display Instructions**

Do not display a facility or unit header on screens that use Place Roster. Allow 3 lines for other header information. Allow 5 lines for question text on screens that use Place Roster, plus a following blank line.

Display 8 lines within the roster window plus a line for headings above, a line drawn to form the bottom of the box, and a blank following line.

Display "**CONSIDER THIS PLACE...**" on the 21st line when there are two or more places on the Roster and at least one of them has NNHES STATUS = ELIGIBLE.

Display interviewer instructions in screen tail (line 24).

Allow two spaces for a checkmark to be displayed at the far left, when a place is selected from the Place Roster.

Allow one space for an asterisk to the left of NAME, to denote places with NNHES STATUS=ELIGIBLE.

Allow 30 spaces for NAME field.

Allow 4 spaces to separate NAME and ALSO KNOWN AS... fields.

Allow 20 spaces for ALSO KNOWN AS... field.

Allow 4 spaces to separate ALSO KNOWN AS... and PLACE TYPE fields.

Allow 10 spaces for PLACE TYPE.

USE ARROW KEYS. ENTER = SELECT. CTRL/A = ADD. TO EXIT, PRESS ESC.

There are five types of Place Roster screens:

1. The Place Roster display for review only;
2. The full Place Roster display for selection and addition;
3. A static display of the facility parts on the Place Roster, excluding the place referenced first in the question text;
4. Dynamic display of all facility parts on the Place Roster, for selection only; and
5. A dynamic display of the eligible facility parts (i.e., NNHES Status=ELIGIBLE and Place Type=ELIGIBLE LTC) for selection only.
The sample layout displayed above is for the second version of the Place Roster, the primary format used in Residence History.

Table 1 shows the functions that are allowed for each Place Roster version, and where each is used in the CAPI application.

</tr>
</tbody>
</table>

Sample layouts of each version follow page 11 as "ATTACHMENT A".

**Version 1.** The "all facility parts" version is for review only. It’s displayed whenever the F2 key is pressed throughout the application. It is also displayed at specific points in the Facility Questionnaire. In the Round 2 New Facility application they are:

- FA16a (in the Facility Structure section) following the entry of parts or units in a complex facility;
- FA30a after the identification of some non-nursing beds in the eligible units; and
- FA66a following the naming of special care units and the remainder of the nursing beds in the eligible unit(s).

The first version differs from the sample layout only in the screen tail (the bottom line on the screen): the interviewer instruction reads "USE ARROW KEYS. TO EXIT, PRESS ESC." Also note that no SP-level data are included; only facility-level places are displayed.

**Version 2.** The "all places" version for selection and addition is the full-blown Place Roster, including SP-level additions from Residence History as well as the facility-level entries. It is only accessed in Residence History: RH21 asks where the SP went (after determining a move occurred).

**Version 3.** The "all ‘other’ facility places" version is not a roster at all, but the static display of "other" facility parts (as a simple list, not in dynamic format). It is used in:

- RH11A and RH11B, questions that determine whether the SP has been in the SAD/TAD unit (or the place at the last interview date) the whole time; and
- RH21C, a question that is called when adding facility places in residence history, to determine if the added place is also known by any of the names for parts of the facility that were already enumerated.

The list of all other facility-level units is displayed (i.e., the unit referenced in the question text is excluded).

The third version display differs markedly from Version 2: only the Place Name and the Also Known As... entry are displayed, and only for places that are collected at the facility level. Furthermore, the RH displays exclude the place referenced first in the question text. There are no asterisks or checkmarks, no indentation, no place type, no footnote for eligible parts of the case, and no interviewer instructions at the bottom.
**Version 4.** Like Version 1 -- it displays all facility parts -- but it allows selection. Two items in the SP-level instruments in New Facilities access this Place Roster display:

- RH2B captures residence at Transfer Admit Date;
- RH21D determines which part of the facility is the same as the place added in RH21;

The display includes an additional line at the bottom of the list, for "OTHER PLACE." (The display for RH21D is an exception; no "OTHER PLACE" choice is displayed for RH21D.) The asterisks are omitted, and there is no footnote beneath the list. The screen tail omits the instruction regarding additions.

**Version 5.** The last type of Place Roster display, the "eligible parts" version, is used in several places to present only the eligible parts of the facility -- that is, places with NNHES STATUS=ELIGIBLE and PLACE TYPE=ELIGIBLE LTC -- at the lowest level reported. (For example, in the sample layout, only the Alzheimer’s Unit and the Health Care Unit would be displayed.)

Eligible parts, including the SAMPLE FACILITY, are listed in FA24PRE. These places are, thereafter, listed in the "special" header, right justified. Eligible parts are listed in FA85PRE (the SAQ item) to help the interviewer record the eligible parts on the SAQ form. The asterisks and footnote are omitted from the display.

Version 5 takes a different form for each appearance. In FA85PRE it is presented as a static list.

**Place Roster Updates.** As noted above, the Place Roster is initialized with the New Facility name. Additions or changes to the Place Roster can occur at the following points in the application:

- **FAVERIF1** (name updates for SF/NF)
- **BOXES FA5, FA7, FA8** (set locator code, hence order of places on Roster)
- **FA11-14** (adds parts or units in complex facilities)
- **BOXES FA10, FA11, FA12, and FA16** (set locator code, status code, and place type)
- **FA26, FA27** (add non-nursing units within eligible units)
- **FA55, FA56** (add special care units)
- **FA66** (adds name for remainder of eligible units)
- **RH21** (adds name of place SP went to)
- **RH21C** (determines if added place is same as a facility unit already listed)
These update points play a role in the design of the F2 function, reviewing the Place Roster at any point in the application. When F2 is invoked, the Place Roster as it existed at the latest update point should be displayed.

In RH21, besides the capability of adding a place to the Roster, the interviewer has the ability to use arrow keys and add or overwrite an entry in the "ALSO KNOWN AS..." field for an existing line.

The Use of Places in SP-level Section Headers

There are no place headers in Residence History. All other SP-level sections feature a header that includes the eligible LTC places in this facility (i.e., places with NNHES status=eligible) where the SP resided during the reference period. The only exception are screens that include the Place Roster; these screens have no places in the header.

For screens that don't include the Place Roster in HS, PM, IA, USE, EX, and CRR, the eligible unit where the SP lived during the reference period is displayed right-justified on the second line of the screen. If the SP lived in three or four eligible units during the reference period, they are right-justified on the third, fourth, and fifth lines. If the SP lived in more than four eligible units, the fifth line reads: "MORE UNITS -- USE F2" and is right-justified.
The Respondent Roster is a list (at the facility level) of all respondents (and potential respondents) identified in the course of data collection.

In the course of the CAPI application, every point that calls for an addition to be made to the Respondent Roster is signalled by a question, such as "Who is ...?" or "What is the name of the ...?" The entry to such a question is automatically posted to the NAME cell on the next available line of the Respondent Roster, the interviewer is presented with the roster screen, and the cursor is in the title cell for the roster addition.

In the title cell the interviewer can enter the title code from memory, and the text for the category should be displayed in the roster. If the interviewer escapes from the roster and the title cell is not filled, the RR2 question is presented as specified at various points throughout the Facility Questionnaire. The question is formatted as a choice roster with answer categories (codes and text) displayed as formatted on the following page. After an entry is made, it should be posted to the respondent roster in the title cell next to the appropriate name.

If FAVERIF6 = 1 (YES, FACILITY IS PART OF A CHAIN), go to FA1A.
Else, go to FA1.

FA1A

I understand that (FACILITY) is part of a chain -- that is, a group of nursing homes operating under common management. Setting that aside, this next question is about the physical location of the home here.

The layout of this screen should be a 2 column format with places arranged in groups, alphabetically within group. No group should be split across columns. Group 1 is items 3, 4, and 5; group 2 is items 6 and 7; group 3 is items 8, 9, 10, 11, and 12; items 13, 91, -8 and -7 follow. This layout should also be used in FA5.

BOX FA5 may be approached from FA1, FA4 (via BOX FA4), or FA5. The context is critical; it determines whether the sampled facility Locator Code is set to NEW FACILITY AND LARGER FACILITY, or whether a LARGER FACILITY is added to the PLACE ROSTER.

| BOX FA5 | If coming from FA1; or FA5; and FA3 not = 6 (HOSPITAL): set new facility locator code = NEW FACILITY AND LARGER FACILITY. Then if FA1 or FA5=13 (HOME OFFICE), go to FA7; others, go to FA8.
If coming from FA6, and FA3 = 6 (HOSPITAL): set the locator code for the place added to PLACE ROSTER =LARGER FACILITY; set the locator code for the new facility = NEW FACILITY, PART OF LARGER FACILITY; and go to FA8. |

NOTE:
The LARGER FACILITY flag is set for a specific place on the Place Roster. It may be the sampled facility (e.g., FA1 = 5), or for a place the sampled facility is part of (e.g., FA3 = 6). No more than one place within a facility case can be classified a LARGER FACILITY.

These categories can be mapped to the categories and subcategories in RH22. Absolute consistency with the presentation in the residence history section is not desirable, however, because here we are asking specifically about a place that we already know is part of a larger facility; in residence history, the questions are designed to categorize the place where the SP resided, regardless of whether it was part of a larger place or not.]

No further action is required in the Facility-level Questionnaire for all Places with NNHES Status=INELIGIBLE.
Then go to FA16a.
Display the Place Roster in a "view only" matrix.

The Place Roster should reflect the hierarchical relationship for added facility places. Added places are assigned a locator code. If the locator code is "PART OF NEW FACILITY" or "PART OF LARGER FACILITY," followup questions will determine date started, date ended and possibly more (if this place looks like a place that should have been enumerated in FA). So if the locator code is "PART OF SAMPLED FACILITY," show it indented under the sampled facility; if it’s "PART OF A LARGER FACILITY," show it indented under larger facility.

BOX FA12

Two basic rules determine which places are eligible for inclusion in this questionnaire:

- Parts of a facility which are on the NHPI determine their own fate, i.e., if a part is listed on the NHPI, it is eligible only if it is the sampled facility.
- Parts of the facility which are not on the NHPI are eligible if they are part of the sampled facility. If the sampled facility is itself part of a larger facility that is not on the NHPI, then a second part of the larger facility, also not on the NHPI, would be considered as well. Essentially, the larger facility, if it is on the NHPI, is the surrogate for its parts which are not on the NHPI. Otherwise, any other part serves as surrogate for these parts.

This leads to the following situations:

1. Parts of a facility which are on the NHPI and are sampled are always considered.
2. Parts of a facility not on the NHPI are only taken when they are part of the sampled facility or when the larger facility they are part of is not on the NHPI.
3. If a larger facility is sampled and all of its LTC parts are on the NHPI, then everything is out of scope for that case.
4. The only way a facility part that is on the NHPI can be considered is if it is sampled.
5. If the NHPI contains no duplicate listings, each LTC part of a facility has only one chance of selection in all cases except one: When the larger facility is not on the NHPI; it has at least 3 parts; at least 2 parts are on the NHPI; and one part is not on the NHPI. The part not on the NHPI has a chance of selection associated with each part that is on the NHPI. This case should be very rare.

If the NEW FACILITY is a larger facility (LF) or a nursing home (NH), or the Place is flagged as LARGER FACILITY, or the Place is coded 4 in FA12, apply the BOX FA12 items. Order Places in Place Roster Order (Larger Facility -- if other than New Facility, Parts of Larger Facility, New Facility, Parts of New Facility). For each Place, apply statements in order until directed to next Place, to Closing, or to Item 7 (the last item in BOX FA12).

| BOX FA12 | 1. If the New Facility’s locator code = NEW FACILITY AND LARGER FACILITY, set NNHES status=INELIGIBLE. (Eligibility will be determined for its parts in the steps below.) Go to next place. If no remaining places, go to Item 7 below.  
2. Omitted.  
3. If NEW FACILITY is a HOME OFFICE for nursing unit(s) (FA1 or FA5 = 13), set NNHES status=INELIGIBLE and go to next Place. If no other Places, go to Item 7 below.  
4. If Place has locator code=PART OF NEW FACILITY, set TENTATIVE ADDITION flag = YES for this Place and go to the next Place or Item 7 below.  
5. If Place has locator code=PART OF LARGER FACILITY, and the Place with locator code=LARGER FACILITY, set TENTATIVE ADDITION flag = YES for this Place and go to the next Place or Item 7 below.  
6. Unless the Place is the New Facility, set NNHES status=INELIGIBLE for this Place and go to next Place or Item 7.  
7. If the new facility’s NNHES status=INELIGIBLE, and no Place is flagged TENTATIVE ADDITION, go to CLOSING 1, p. 70. Else, loop through FA17 and FA18 for each TENTATIVE ADDITION. Else, if no TENTATIVE ADDITIONs, go to FA19 for NEW FACILITY. |
Ask FA17 and FA18 for each pending Place flagged as TENTATIVE ADDITION. (All TENTATIVE ADDITIONS are pending until they are subjected to the ELIGIBILITY BLOCK; a Place is no longer pending after the ELIGIBILITY BLOCK -- FA19-23 -- has been completed for it.) If a new respondent (entered earlier in another pass through FA18) has been selected, present only those TENTATIVE ADDITIONS for which they have been nominated as a knowledgeable respondent.

MANAGEMENT SYSTEM SPECS:
If DK or RF are entered, flag FA23 for retrieval from another respondent in this facility.

BOX FA15A
Return to FA19 for next PLACE that has FA17 = 1 (YES) for this respondent.
If no remaining place, go to BOX FA16.

BOX FA16
To be deemed eligible, a place must (1) have three or more beds, and (2) be certified by Medicaid or Medicare or be licensed as a nursing home and provide 24 hour, 7 day a week supervision by an RN or LPN.
Subject each place looped through FA19-23 with this respondent to the steps in BOX FA16, one place at a time.

1. If FA19 is less than 3, flag FACILITY/TENTATIVE ADDITION as INELIGIBLE, set Place Type = INELIGIBLE LTC, decrement counter, and go to next Place or Item 6 below.
   Others, go to Item 2 below. [NOTE: This means DK and REF are assumed equal to 3 or more.]

2. If FA20 or FA21 = 1 (YES, CERTIFIED BY MEDICAID OR MEDICARE) set NNHES STATUS = ELIGIBLE and go to next Place or Item 6 below.
   Others go to Item 3.

3. If FA22 = 1 or 2 (LICENSED BY STATE HEALTH DEPT. OR SOME OTHER AGENCY), and FA23 = 1 (PROVIDES AROUND-THE-CLOCK NURSING SUPERVISION), set NNHES STATUS = ELIGIBLE and go to next Place or Item 6 below.
   Others go to Item 4.

4. If FA20, 21, 22, or 23 = -8 or -7, decrement counter, set a flag for retrieval, ask FA18 and go to next Place or Item 6.
   Others go to Item 5.

5. Set NNHES STATUS = INELIGIBLE, set Place Type = INELIGIBLE LTC, decrement counter, and go to next Place or Item 6.

6. If no remaining places for this respondent, but these are other pending tentative additions, go to CLOSING 3, p. 83.

7. Else,
   If counter > 1, go to FA24PRE.
   If counter = 1, go to FA25.
   If counter = 0, go to Closing 1.
Display Version 5 of Place Roster.
If NEW FACILITY is eligible, display \{FACILITY and\}.
Throughout remainder of FA, FR, FG, and SS, display names of all Places displayed in FA24PRE (including NEW FACILITY, if filled in FA24PRE) as a special header right justified beginning on line 2 in the upper right corner of the screen. Also, throughout remainder of FA, FR, FG, and SS, for \{FACILITY\} fill, if only one eligible place, fill with PLACE NAME from Place Roster. If more than one eligible place, fill with \[READ FAC/UNITS LISTED ABOVE\]. If more than 4 places, display "MORE UNITS -- USE F2" on line 5.

All of the remaining questions will refer to \{FACILITY and\} \{(READ FAC/UNITS LISTED BELOW)\} combined.

(PLACE ROSTER VERSION 5)
PRESS ENTER TO CONTINUE.

BOX FA17 omitted.

Fill with "all" if more than 2 places with NNHES STATUS=ELIGIBLE. If only two, fill with "both".

The questions are about the number of nursing beds and residents by payor type, special care units, and staffing. Can you answer these questions about \{all/both\} of these places?

- If facility or any unit within the facility is certified by Medicare (FA21=1), display "FA45 CERTIFIED BY MEDICARE" with an entry field to the right. If facility or any unit within the facility is also certified by Medicaid (FA20=1), display "ONLY" in reverse video.

- If facility or any unit within the facility is certified by neither Medicaid (FA20=0) nor Medicare (FA21=0), display "FA46 CERTIFIED BY NEITHER MEDICAID NOR MEDICARE;" display "NEITHER" in reverse video. If facility is certified by Medicaid only (FA20=1, FA21 not=1), display "NOT CERTIFIED BY MEDICAID," with "NOT" in reverse video. If facility is certified by Medicare only (FA20=1, FA21 not=1), display "NOT CERTIFIED BY MEDICARE," with "NOT" in reverse video. To the right, prefill with the result of FA19 minus the sum of FA28 minus FA43 minus FA44 minus FA45.

When there is an entry in all previous questions that have been displayed in this series, the question text for FA46 should pop up at the top of the form, and the interviewer instructions for answer categories and an entry field for 1 or 0 should pop up at the bottom of the form.

Wherever MEDICAID appears on the screen, follow the display instructions above FA20 for adding ([OR STATE NAME FOR MEDICAID]).

Overall Programming Specifications

All of the overall programming specifications specified in the Facility-Level Questionnaire, pages 2 -19, are applicable in the Facility Missing Data Module.

If there is any facility missing data still outstanding, after entering a response to the last MD item in facility level missing data, the cursor returns to the MD management screen (FQ_MISS); else if there is no missing data, in any of the three "sections" (i.e., Facility Questionnaire, Status of SAQ, Status of Facility Rate Schedule), the application goes to FAEND, then to the Facility Navigation Screen (F_SELECT).
SECTION MD: FACILITY MISSING DATA

Facility Level Data Retrieval
At the facility level, data retrieval of missing data may occur at three different points in the application. The first is data retrieval of critical items (and other non-critical items noted for data retrieval) in the FA section of the facility questionnaire. The second is collection of the facility rate schedule. If FR1PRE = 2 (a printed rate schedule will be available later in the day), then the data retrieval "introduction screen" (FQ_MISS) will include collection of the facility rate schedule as a viable choice. The final point at which data retrieval may occur is for collection of the SAQ. If at FA85 (status of the SAQ), the status is other than "4" or "2" ("COMPLETE"), the data retrieval introduction screen will include updating the status of the SAQ as a choice.

On the facility navigate screen, if there is any data retrieval to be done, then the line for "CURRENT STATUS" will indicate that facility data retrieval needs to be done and the line for "FACILITY QUESTIONNAIRE" will say "MISSING DATA".

2. SAMPLING STATUS (COMPLETE)
3. SP NAVIGATION (READY)

When "1" is selected at the navigate screen when the facility questionnaire status is "MISSING DATA", the flow is from the navigate screen to FQ_MISS. This screen provides the interviewer with the options for collecting missing data as described above.

</tr>
<tr>
<td>2. MARK STATUS OF SAQ (FA85)</td>
</tr>
<tr>
<td>3. COLLECT THE FACILITY RATE SCHEDULE (FR1PRE)</td>
</tr>
</tbody>
</table>

PROGRAMMER SPECS:

1. RETRIEVE FACILITY LEVEL MISSING DATA

When item 1 is selected the interviewer is presented with the missing data summary screen. This screen provides for review of all missing data for the sampled facility. It will have a permanent header, centered, that says: **THE FOLLOWING ITEMS ARE MISSING FROM FQ. CONFIRM THAT RESPONDENT CAN ANSWER AT LEAST ONE QUESTION.**

After reviewing these items and pressing <ENTER> on the last of the review screens, the interviewer is presented with the respondent roster (RR1) in order to select the respondent who will attempt to answer the missing data questions.

If a respondent is selected, the application is steered to the first of the missing data items followed by all remaining missing data items. After entering an answer for each item, the interviewer is returned to FQ_MISS. (Unless there is no more missing data, in which case, the application goes to FAEND, then the facility navigation screen.)

The items in the facility application that may be flagged for data retrieval are as follows:

- FAVERIF1-5
- FA2 (part of larger facility)
- FA19-23 (eligibility block)

"MISSING DATA" on the FQ_MISS screen and at the navigate screen can be set to COMPLETE if none of the items in the missing data module are flagged "-8" (DK). Otherwise, the MD module remains open.

If there is no facility level missing data, that is "1" is not a viable entry, display a message at the bottom of this screen: "THERE IS NO FACILITY LEVEL MISSING DATA."

2. MARK STATUS OF SAQ

If the interviewer selects "2" from FQ_MISS, CAPI goes directly to FA85 and the interviewer updates the SAQ status accordingly.

If FA85 for the FACILITY/ELIGIBLE UNITS has been entered as "2" or "4", display a message at the bottom of the screen: "THERE ARE NO STAFFING SAQS THAT NEED TO BE MARKED."
3. COLLECT THE FACILITY RATE SCHEDULE

If the interviewer selects "3", from FQ_MISS, CAPI goes to FR1PRE. In the data retrieval module, all of the text on the screen is optional because FR1PRE has already been presented once. It is important to display the text in FR1PRE because it shows the interviewer (in the header) the units to be included on the rate schedule as well as the types of rates (i.e., Medicaid, Medicare, private pay) expected. If a printed rate schedule is provided, the interviewer will check the schedule for the expected rates, as specified in section FR of the facility questionnaire.

If FR1PRE is coded "1" or "0" for all FACILITY/ELIGIBLE UNITS, display a message at the bottom of the screen: THERE ARE NO FACILITY RATE SCHEDULES THAT NEED TO BE COLLECTED.

What follows are the three different Missing Data modules relevant to facility level data collection.
RETRIEVE FACILITY LEVEL MISSING DATA

FQ_MISS1
For any critical items with invalid responses (as specified in the programmer specifications for the Facility Questionnaire), display flush left, the screen name of the missing item and in a second column the screen text for that item. Display the items in the same sequence in which they appear in the application.

FQ_MISS1

THE FOLLOWING ITEMS ARE MISSING FROM FQ.
CONFIRM THAT RESPONDENT CAN ANSWER AT LEAST ONE QUESTION.

**FAVERIF6**

A chain is a group of nursing homes or facilities that are operated under common management. Chain nursing homes/facilities are physically located at different sites. Common ownership is not sufficient to define a chain; the group of nursing homes must be under common management as well to qualify as a chain.
By definition, free-standing nursing homes are located in their own building or unique site and are not associated with any other places that provide long-term care or other services to disabled or elderly populations in that building or on that site.

One exception: A few hospital-based SNFs (Skilled Nursing Facilities) may be located in a satellite location (i.e., on a separate site from the hospital). These should be classified in category 7 (hospital-based SNF unit).

Examples of places that are PHYSICALLY part of a LARGER place or campus are a Skilled Nursing Facility (SNF) wing that is a part of a hospital, special care unit (e.g., Alzheimer’s unit) that is part of a nursing home, or a nursing home that is a part of a retirement community.

"Hospital" is a broad concept. It includes the following: acute care hospitals; private psychiatric hospitals; state or county hospitals for the mentally ill; Veterans Administration hospitals and medical centers; state hospitals for the mentally retarded; chronic disease, rehabilitation, geriatric, and other long-term care hospitals; and other places that are commonly called hospitals.

A hospital-based SNF unit is certified by Medicare to provide skilled nursing services. It could be based within any of these hospital types.

Assisted living facilities, board and care homes, domiciliary care homes, personal care homes, and rest homes are various terms for residential care facilities. They are places that offer residents help with activities, such as bathing and dressing, but do not provide 24-hour nursing services. (Some residents at a residential care facility may not require such assistance, but it must be available to them.)

Include all beds staffed and set up for residents. Do not include beds used by staff or owners or used only for day care patients or emergency care.
"Non-nursing beds" are beds that are not certified or licensed to provide residents the level of skilled nursing care, rehabilitation services, or other health-related services that are provided in nursing beds. The key difference is that certified or licensed nursing beds have on-site supervision by an RN or LPN 24 hours a day, 7 days a week; non-nursing beds do not.

Non-nursing beds may provide residents some level of care, supervision, and assistance with activities of daily living but at a level below the care provided those in nursing beds.

Non-nursing beds range from apartments in a retirement community, where residents are responsible for their own care, to an assisted-living wing of a nursing home in which residents receive some assistance in daily living skills, such as eating, bathing, and housekeeping.

Dialysis can mean peritoneal (abdominal cavity) dialysis or kidney dialysis.

"On-site" means on the premises of the nursing home or facility. If the nursing home is part of a larger facility or campus, this question refers to services provided by the nursing unit, within the nursing unit itself (not elsewhere in the larger facility), to people who are not residents of the nursing unit.

"Off-site" means outside the premises of the nursing home or facility. If the nursing home is part of a larger facility or campus, this question refers to services provided by the nursing unit, at some location outside the nursing unit itself, to people who are not residents of the nursing unit. For example, consider a CCRC with a nursing unit, an assisted-living unit, and independent living apartments. If the nursing unit provides homemaker services to the independent living residents in their apartments, you would select the second category in this question.
