NATIONAL STUDY

ASSURANCE OF CONFIDENTIALITY

Information contained on this form that would permit identification of any individual or establishment is collected with a guarantee that it will be held in strict confidence by the contractor and AHCPR, will be used only for purposes stated in this study, and will not be disclosed or released to anyone other than authorized staff of AHCPR without the consent of the individual or the establishment in accordance with Section 903(c) of the Public Health Service Act (42 U.S.C. 299a-1(c)).

Public reporting burden for this collection of information is estimated to average 5 minutes per response. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Reports Clearance Officer, Attention: PRA, United States Public Health Service, Paperwork Reduction Project (0935-0099), Hubert H. Humphrey Building, Room 7-37F, 200 Independence Avenue, S.W., Washington, D.C. 20201.
The Facility Residence History instrument is designed to accommodate the needs of all SPs in all types of facilities. This streamlined approach should be more efficient for the programming, testing, and instrument management activities, but the tradeoff is that the combined document is somewhat more complex than any of the individual instruments it replaces. It may be useful to review the definitions of some key phrases used throughout the specifications.

The instrument regularly refers to several types of SPs:

"Continuing resident still in the facility at the end of the previous round reference period." This can refer to a CR or F2 who is still in the sample facility at the end of the previous round, or to a transfer SP in either a sample or a new facility at the end of the previous round. The key is that the Residence History will try to come forward from the previous round interview date.

"Continuing resident discharged alive from the facility at the end of the previous round reference period." This can refer either to a CR or F2 sampled in the current facility, or to a transfer SP who was in the current facility last round. In either case the SP gets the "readmit check". If readmitted, this SP goes forward with timeline data, otherwise the rest of the data collection is skipped. This SP is sometimes referred to as a "readmitted SP".

"SP sampled in this facility in this round." This means first admissions sampled in the current round in the sample facility (keeping in mind that these SPs will also be fielded in new facilities the current round). This person gets pre-stay (backwards from SAD to 1/1/96), the eligibility check, and timeline (from SAD to the end of the current round reference period).

"First residence history for this SP is this facility, and SP not sampled in this facility." This is a first-time "Transfer SP", either in a sample or new facility. If admitted to the facility, this SP goes forward from the admit date (TAD). Timeline data is collected first then, if there is a discrepancy between TAD and the date reported by the previous source, pre-stay. If the SP hasn't been admitted, the data collection stops. The interviewer is instructed to begin tracing on this SP.

There are some other data elements that occur throughout these specifications, and that programmers, testers, and other reviewers may wish to keep in mind.

The current end of round reference period. This date sets the end of data collection for the current round. It is earliest of date of death from residence history or sampling, the date of interview or December 31, 1996.

The "end of the previous round reference period."

The "most recent date of discharge in the previous round."

The "admission date reported by the previous source." This is used for first-time transfer SPs as the starting point for collecting the Residence History, and is the date reported by a previous facility or community respondent that the SP began staying at the current facility.

Key reference dates are:

Sampled Admission Date (SAD). For current residents, the date of the most recent admission to a sampled facility prior to January 1, 1996. For first admissions, the date of the first admission to a sample facility during the reference year, January 1, through December 31, 1996.

Key Admission Date (KAD). The beginning of the episode of sampled nursing home care. The date of the first admission to a sampled facility, excluding readmission following an acute care hospital stay.

In-scope Admission Date (IAD). The beginning of an episode of eligible nursing home care. The date of the first admission to an eligible nursing facility, excluding readmission following an acute care hospital stay.

Transfer Admission Date (TAD). The date of admission to an eligible facility, either a sampled facility or a new facility, by a sampled person who transfers to the facility during the reference year as reported by the transfer facility.
End Date for Earliest Community Stay. The date of the beginning of the episode of institutionalization. The end date of the most recent time the sampled person lived in the community.

Place type definitions are as follows:

The purpose of defining place type in residence history is to define stays in eligible long-term care units to collect data for appropriate periods of time, e.g., use of acute care services, expenditures, health status, etc.

Eligible long-term care. Stays in a bed certified by Medicaid or Medicare or licensed and providing 24 hour on-site supervision by an RN or LPN seven days a week. These places include nursing homes, nursing units of retirement centers or CCRCs and SNF wings or units of hospitals.

Ineligible long-term care. A stay in a bed that is not certified or licensed as defined above but provides services for personal care. These places include residential care places, e.g., board and care homes, personal care homes, assisted living homes, or like units of a retirement center or CCRC.

Hospital. A stay in a bed in a hospital.

Community. These places include all independent living units of retirement homes or CCRCs as well as private homes and apartments. Places that do not meet any of the above definitions are classified as community places.

First admission eligibility codes are defined as follows:

"EF" is an eligible first admission; data collection continues
"PF" is a provisionally eligible first admission; data collection continues
"IF" is an ineligible first admission; data collection stops.

There is an additional code, "SE", set when the SP has been sampled in error. For example, ineligible units were included in error on the sampling list and the SP was a resident of an ineligible unit.

SET-UP ITEMS

The set-up items perform two functions: first, they verify or collect certain items necessary to continue with the residence history; second, they establish the current round reference period. Examples of the first function include verifying the Sampled Admission Date (SAD) and collecting date of birth. The second function depends on the SP’s vital status. If the SP is alive and current resident, then the previous round reference period is from the end of the previous round reference period through the current round date of interview. If the SP is deceased and a current resident, then the current round reference period runs from the end of the previous round reference period through the date of death.

PRE-STAY ITEMS

This is the first section after set-up items completed for all SPs selected as admissions. We will probe for stays prior to the Sampled Admission Date (SAD) to identify all places where the SP was resident. We will stop and ask pre-stay items when a stay spans January 1, 1996, and a community stay has been reported during pre-stay, or when a community stay is reported that begins before January 1, 1996, or when there is missing data in the pre-admission items, e.g., “Don’t know” to the begin date or place name. Once the residence history is complete for this period, interviewers will search for places classified as eligible long-term care places on the NHPI. Once the NHPI search is complete, an algorithm will be run to determine whether or not the SP is eligible as a first admission. All data collection will stop for persons determined to be ineligible. Figure 1 is a flowchart presenting the eligibility algorithm. Data collection for eligible SPs will continue with residence history for the period between SAD and the current round end of reference period.

For eligible admissions the algorithm programmed to determine KAD and IAD will be run after all residence history data collection is complete. The pre-stay data will be used to determine KAD and IAD. Pre-stay is collected for current residents after timeline data is collected. We collect data going backwards from SAD until we collect a community stay or the respondent says "Don’t know." The algorithm programmed to determine KAD and IAD will be run after all residence history data collection is complete.
PROBE

This probe determines whether the SP spent one or more nights in another unit of the facility, a hospital, or any other place. If the SP has not spent one or more nights in any other place, the timeline is complete. We continue asking this probe until the answer is “NO.” Stays are collected chronologically from the end of the Round 1 reference period or SAD to the end of the Round 2 reference period.

DATE QUESTIONS. For each place identified, on the matrix we will collect the start date or leave date of the stay. For each place following a stay in the facility, we will collect whether or not the SP was formally discharged, and if a bed was held.

TIMELINE MATRIX/FORM

PLACE ROSTER. All places reported during the residence history, will be consolidated on the facility-level Place Roster. The first entries on the Place Roster will be the general nursing and special care units within the facility and the units affiliated with the facility collected during the facility structure. Whether these units are eligible LTC, ineligible LTC, hospital or community places will also have been defined during the facility structure data collection.

Interviewers will add to or select from the Place Roster all places reported during the residence history data collection for each SP in the facility. The type of place will be collected and defined during residence history data collection for all places added to the Place Roster. The purpose of the Place Roster is to consolidate reported places to relieve data collection burden. Interviewers will search the Place Roster first for reported places and, if there is a match, will highlight the place and it will be linked to the residence history stay record. If there is no match, the interviewer will add the place to the Place Roster.

The flow of questions is directed within the timeline matrix according to whether the place is selected or added to the Place Roster. If the place is a facility unit, the question flow is directly to the Probe. If the place is hospital, the question flow first goes to Hospital Questions and then flows directly to the Probe. If the place is other place, the question flow first goes to Other Places Questions and then flows directly to the Probe.

HOSPITAL QUESTIONS. This section collects the name, address and type of hospital for each new hospital identified. The first time it is reported the AHA will be searched to try to find it (see below). For all hospitals the AHA identifies as having a SNF unit, the interviewer asks whether this stay was in a Skilled Nursing Facility (SNF) wing or unit of the hospital. Interviewers will attempt to collect diagnosis for each reported hospital stay.

OTHER PLACES QUESTIONS. This section collects the name, address, and type of place. For each place, type will be collected by asking the respondent to classify the place. Places classified as long-term care will be searched for on the NHPI (at the end of the Residence History). Places classified as “community” will have additional probes to ascertain with whom the SP was living and whether the SP received home health services there.

TIMELINE MATRIX DISPLAY (STAY ROSTER)

Several questions through the body of the Residence History contain the instruction “display Timeline.” The basic specifications for displaying the timeline are:

1. Display the timeline as a roster a box at the bottom of the screen that has room for four lines, with each line representing one residence history stay.

2. Each line should have four elements: the name of the place, the begin and end dates of the stay, and the stay type (PLACKIND). If any date component (month, day, or year) is refused, substitute “RF” in the timeline display; if any date component is not known, substitute “DK”. Otherwise, zero-fill the date displays.

3. The lines should always be displayed in chronological order, from top to bottom.
In addition, there are two variations on which lines should be displayed, depending on whether the questions are being administered as part of pre-stay or Timeline. If coming from pre-stay, display the information for the current stay (i.e., that stay for which CAPI is now collecting information) in the top row, followed by (up to) the next three stays in chronological order. These next three stays may or may not include the SAD, depending on how many pre-stay stays have already been reported. Examples:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>START DATE</th>
<th>END DATE</th>
<th>STAY TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASSISTED LIVING UNIT</td>
<td>11/15/95</td>
<td>12/12/95</td>
<td>INELIG</td>
</tr>
<tr>
<td>SAMPLED UNIT</td>
<td>12/12/95</td>
<td>05/18/96</td>
<td>ELIG LTC</td>
</tr>
</tbody>
</table>

In this first example (a live CR still in the facility on the 5/18/96 date of interview), we are collecting data about the assisted living unit stay, the SAD stay is clearly visible on the second line, and there are not yet any other stays. In a situation with many pre-stay stays, we may not be able to see the SAD stay:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>START DATE</th>
<th>END DATE</th>
<th>STAY TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASSISTED LIVING UNIT</td>
<td>06/06/95</td>
<td>06/19/95</td>
<td>INELIG</td>
</tr>
<tr>
<td>HOSPITAL</td>
<td>06/19/95</td>
<td>06/24/95</td>
<td>HOSP</td>
</tr>
<tr>
<td>SAMPLED UNIT</td>
<td>06/26/95</td>
<td>09/29/95</td>
<td>ELIG</td>
</tr>
<tr>
<td>ASSISTED LIVING UNIT</td>
<td>09/29/95</td>
<td>12/12/95</td>
<td>INELIG</td>
</tr>
<tr>
<td>SAMPLED UNIT</td>
<td>12/12/95</td>
<td>05/18/96</td>
<td>ELIG</td>
</tr>
</tbody>
</table>

The italicized stay is the SAD stay, but is not shown on the timeline display because we start with the current stay and move chronologically.

For timeline stays, we should also display the current stay, as the last line. Again, what else the interviewer can see depends on how many stays have been reported:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>START DATE</th>
<th>END DATE</th>
<th>STAY TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAMPLED UNIT</td>
<td>12/12/95</td>
<td>02/19/96</td>
<td>ELIG</td>
</tr>
<tr>
<td>HOSPITAL</td>
<td>02/19/96</td>
<td>02/22/96</td>
<td>HOSP</td>
</tr>
</tbody>
</table>

This CR has a SAD of 12/12/95, and we are in the middle of picking up information about a hospital stay. If there are several stays, the timeline might look like:

<table>
<thead>
<tr>
<th>PLACE NAME</th>
<th>START DATE</th>
<th>END DATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAMPLED UNIT</td>
<td>12/12/95</td>
<td>02/19/96</td>
</tr>
<tr>
<td>HOSPITAL</td>
<td>02/19/96</td>
<td>02/22/96</td>
</tr>
<tr>
<td>OTHER NURSING HOME</td>
<td>02/22/96</td>
<td>03/17/96</td>
</tr>
<tr>
<td>ASSISTED LIVING UNIT</td>
<td>03/17/96</td>
<td>04/14/96</td>
</tr>
<tr>
<td>SAMPLED UNIT</td>
<td>04/14/96</td>
<td>05/03/96</td>
</tr>
<tr>
<td>HOSPITAL</td>
<td>05/03/96</td>
<td>05/12/96</td>
</tr>
</tbody>
</table>

In this case, the timeline display shows the current stay as the last line, along with the three preceding stays. The italicized stays are not shown on the timeline display.
NATIONAL HEALTH PROVIDER INVENTORY (NHPI)

Once the residence history data collection is completed for an SP, interviewers will search the NHPI for all places identified as LTC places. The frame used for the sample, the NHPI, will be loaded into each interviewer’s laptop computer. Interviewers will search the NHPI to attempt to match nursing homes and other long-term care institutions identified during residence history. All nursing homes and other long-term care places will be searched on the NHPI, because interviewers and respondents have difficulty classifying long-term care places and because of births on the frame.

HOSPITAL PROVIDER DIRECTORY (AHA)

Interviewers will search the Hospital Provider Directory the first time a hospital is reported to collect the address. The frame used for the Hospital Provider Directory will be the American Hospital Association file of hospitals. We will flag hospitals with SNF wings or units, as certified by the Health Care Financing Administration, and use that flag to probe for a stay in the SNF unit of the hospital. Stays in the SNF unit of the hospital will be flagged as eligible long-term care stays. Stays in hospitals with no flag for SNF unit will be classified as hospital stays.

MGMT SYSTEM SPEC. for all of RESIDENCE HISTORY:

- Unless otherwise specified, allow DK and RF.
- DK must be retrieved with another facility respondent; if still missing, must retrieve with community respondent.
- RF must be retrieved with community respondent.
- Set current DOI to “today”.

<tbody>
<tr>
<td>If SP is a live continuing resident still in the facility at the end of the previous round reference period,</td>
<td>go to RH2PRE.</td>
</tr>
<tr>
<td>If the SP is a continuing resident discharged alive from the facility at the end of the previous round reference period,</td>
<td>go to RH2PRE1.</td>
</tr>
<tr>
<td>If this is the first residence history for this SP in this facility,</td>
<td>go to RH1PRE.</td>
</tr>
<tr>
<td>If the SP is deceased at the end of previous round reference period, no residence history data is collected.</td>
<td></td>
</tr>
</tbody>
</table>

RH1PRE
Introduction for first residence history for this SP. If SP sampled in this facility, display "January 1, 1996 and today," otherwise, display "{her/his} admission to this facility and today." If facility has more than one place on the Place Roster display "other parts of {FACILITY}," else not. Display {UNIT FROM SAMPLING} if sampled in this facility this round, else display FACILITY.

RH2PRE
Display the unit where SP was living at the date of previous round interview. If facility has more than one place on the Place Roster display "other parts of {FACILITY}," else not.

RH2PRE
On my last visit on {DATE OF PREVIOUS ROUND FACILITY INTERVIEW}, {SP} was alive and a resident of {UNIT WHERE SP WAS RESIDENT ON DATE OF PREVIOUS ROUND INTERVIEW}. Now, I would like to ask you about all the places {SP} has stayed since my last visit, including staying in {other parts of {FACILITY},} hospitals or other places.

PRESS ENTER TO CONTINUE. (BOX RH1)

PRESS ENTER TO CONTINUE. (RH7)
RH2PRE1

Design note: This item checks whether discharged SPs have been readmitted to the facility. If readmitted, we extend the discharge stay as the first current stay of this round at RH13.

If facility has more than one place on the Place Roster display "other parts of {FACILITY},” else not.

RH2PRE1

On my last visit on {DATE OF PREVIOUS ROUND FACILITY INTERVIEW}, (SP) had been discharged alive from (UNIT WHERE SP WAS A RESIDENT AT MOST RECENT DATE OF DISCHARGE IN PREVIOUS ROUND) to (DISCHARGE PLACE) on (MOST RECENT DATE OF DISCHARGE IN PREVIOUS ROUND). Since then has (SP) been readmitted to (UNIT WHERE SP WAS A RESIDENT AT MOST RECENT DATE OF DISCHARGE IN PREVIOUS ROUND) (or other parts of {FACILITY})?

PRESS F2 FOR PLACE ROSTER. PROBE FOR LTC UNITS.

YES ........................................... 1 (RH7)
NO ............................................ 0 (BOX RHB)
DK ............................................ -8 (RH3)
RF ............................................ -7 (RH3)

BOX RHB If discharge place = hospital (PLAC. HOSPKIND) go to RH7, else go to BOX RH33.

BOX RH1 If SP sampled in this facility in this round, go to BOX RH1A. Otherwise, go to RH2A.

BOX RH1A If unit name is "IN FACILITY -- CAN’T TELL WHERE" from sampling (SS19) and facility has more than one eligible unit, go to RH1; otherwise go to RH2.

RH1

Display all eligible LTC units from Place Roster (Version 5) as a choice list. Add "SOME OTHER PLACE" as a last choice. If there are eligible sub-units within the SF, do not display the SF. If round = 1 (CR), display "as of midnight December 31, 1995,” else display on "SAD”.

RH1

Where was (SP) a resident {as of midnight December 31, 1995/on SAD}?

SELECT ONE.

{PLACE ROSTER VERSION 5}
If "SOME OTHER PLACE" is selected from roster in RH1, go to RH1A; else Go to RH2.

<table>
<thead>
<tr>
<th>BOX</th>
<th>RH1B</th>

</tbody>
</table>

**RH1B**
Display Place Roster Version 5 as a "Selected One" roster.
Display as an overlay to RH1B.
If round = 1, display "December 31, 1995"; otherwise, display SAD.

**RH1B**
Where was the bed that was held for {SP} on {December 31, 1995/SAD}?

SELECT ONE.

(PLACE ROSTER, VERSION 5)
Display the SAD from sampling after "SAMPLED ADMIT DATE." If round = 1, display "for the stay that includes January 1, 1996", else not.

Design note: If the second eligible stay has been sampled in error, data is collected in pre-stay including the first eligible stay. The SAD is recalculated in BOX RH32.

---

**SAMPLED ADMIT DATE:**

On what date was {SP} admitted to {FACILITY UNIT WHERE SAMPLED} {for the stay that includes January 1, 1996}?

MONTH ( ) DAY ( ) YEAR 19( ) (BOX RH2)

---

**PROGRAMMER SPECS:**

Date must be before January 1, 1996, for SPs selected as January 1, 1996, residents in Round 1. If date is on or after January 1, 1996, the soft range message should appear: "The admission date must be before 1/1/96. Please probe for the admission date of the stay that includes 1/1/96."

Date must be between 1/1/96 and 6/30/96, for SPs selected at first admissions in Round 2. If date is before 1/1/96 or after 6/30/96, a soft range should appear: "The admission date must be between 1/1/96 and 6/30/96. Please probe for the admission date that is between 1/1/96 & 6/30/96.

Date must be between 7/1/96 and 12/31/96, for SPs selected as first admissions in Round 3. If date is before 7/1/96 or after 12/31/96, a soft range message should appear: "The admission date must be between 7/1/96 and 12/31/96. Please probe for the admission date that is between 7/1/96 & 12/31/96."

If any part of date is DK or RF, go to RH3, otherwise go to BOX RH2.

If Date of Birth is known, perform hard range edit to ensure that date is on or after Date of Birth; if error, display message: "Date must be on or after date of birth (mm/dd/yy). Please re-enter."

If Date of Death is known, perform hard range edit to ensure that date is on or before Date of Death; if error, display message: "Date must be on or before date of death (mm/dd/yy). Please re-enter."
RH2A

Design note: This item collects the TAD for transfer SPs.

On what date do your records show {SP} was admitted to {FACILITY}?

IF SP NEVER ADMITTED, ENTER SHIFT/5 IN MONTH FIELD. (RHENDB)

MONTH ( ) DAY ( ) YEAR 19( )

PROGRAMMER SPECS:
If SP was not sampled in this facility (transfer SP), perform a soft range edit: if date is before admission date reported by a previous source, display message "Expected admission date on or after {ADMISSION DATE REPORTED BY A PREVIOUS SOURCE}. Please verify and re-enter."
Set RH2A date as TAD.
If any part of date is DK or RF, go to RH3, otherwise go to RH2B.

| BOX RH1D | If facility has more than one unit go to RH2B, otherwise go to RH7. |

RH2B

Display Place Roster Version 4 for the transfer facility. H does not include "SOME OTHER PLACE."

Where was {SP} a resident on {TAD}?

IF A BED WAS HELD FOR SP, PROBE: Where was the bed that was held for SP on {TAD}?

SELECT ONE {PLACE ROSTER VERSION 4}. (RH7)

PROGRAMMER SPECS:
Set as TAD unit. Do not allow changes to previously entered place names.
Please tell me the name and title of someone in (ELIGIBLE FACILITY) who could give me that information.

RECORD RESPONDENT INFORMATION ON PAPER FROG.

PRESS ENTER TO CONTINUE.

PROGRAMMER SPECS:
Go to SPNAVIGATE.

If SAD collected from sampling is DK or RF, go to BOX RH3. Otherwise, compare SAD in RH2 to sampling SAD. If discrepant, go to RH4; otherwise go to BOX RH3.

Earlier from a list of residents, I recorded that {SP} was admitted on (SAD from SAMPLING). Which of these dates is correct?

- (SAD from SAMPLING) .................................. 1
- (SAD from RH2) ............................................ 2
- DISCREPANCY IS LEGITIMATE
  (EXPLAIN :________________________________) ........... 3

If RH4=1 use SAD from sampling;
Else use SAD from RH2.
If round = 1 (CR), if SAD is before 1/1/96, go to BOX RH4;
If round = 2 (F2), if SAD is on or after 1/1/96 and SAD is on or before 6/30/96, go to BOX RH4;
If round = 3 (F3), if SAD is on or after 7/1/96 and SAD is on or before 12/31/96, go to BOX RH4.
Else, classify SP as “SE” and go to RH5.

I do not need to collect any more information for {SP}.

PRESS ENTER TO RETURN TO NAVIGATION SCREEN.

PROGRAMMER SPECS:
Go to navigation screen.

If sex is DK or RF from sampling, ask RH6. Otherwise, go to BOX RH5.
ASK IF NOT OBVIOUS.

Is {SP} male or female?

MALE .......................................... 1
FEMALE ....................................... 2

If vital status or date of death is DK or RF from sampling, go to RH7. Otherwise, go to BOX RH7.

If today's date is 1/1/97 or later display, "Was {SP} alive on December 31, 1996?"; otherwise, display "Is {SP} alive?"

{Is {SP} alive?/Was {SP} alive on December 31, 1996?}

YES ........................................... 1 (BOX RH7)
NO ........................................... 0 (RH8)
DK ........................................... -8 (BOX RH7)
RF ........................................... -7 (BOX RH7)

On what date did {SP} die?

IF RESPONDENT ANSWERS "DK," PROBE: "Do you know what month {SP} died?"

MONTH ( ) DAY ( ) YEAR 1996

PROGRAMMER SPECS:
If SP sampled in this round in this facility, and round = 2, 3, and date entered is before SAD, display message: "Date must be on or after (SAD). Please re-enter."

If SP sampled in this round in this facility and round = 1, if date entered is before 1/1/96, display message: "Date must be on or after January 1, 1996. Please re-enter."

Else if SP was a live, continuing resident still in the facility at the end of the previous round reference period, and date entered is before the end of previous round reference period, display message: "Date must be on or after (PREVIOUS ROUND END OF REFERENCE PERIOD). Please re-enter."

Else if SP is a transfer, and date entered is before the TAD, display message: "Date must be on or after (TAD). Please re-enter."

Else, for all SPs, if Date of Birth is known, perform hard range edit to ensure that Date of Death in RH8 is on or after Date of Birth; if error, display message: "Date of death must be on or after date of birth (mm/dd/yy). Please re-enter."
If month of death is DK or RF, go to RH3. Otherwise:
   If day is DK or RF, set Date of Death to last day of month or today’s date if month of death = DOI month. Set flag to indicate current end of round reference date was set to the end of the month and to flag for retrieval. Go to BOX RH7.

If SP is deceased:
   - Set the current end of round reference period to the earliest of December 31, 1996, the date of death from BOX RH6 or sampling, the date of interview or 12/31/96.
   Otherwise set the end of the current round end of reference period to the current DOI (display "today").
SPs sampled in the current round in the current facility go to BOX RH8. Others go to BOX RH9A.

If date of birth DK or RF from sampling, go to RH9; otherwise, go to BOX RH9A.

What (is/was) (SP’s) date of birth?
ENTER A 4-DIGIT YEAR.
MONTH ( ) DAY ( ) YEAR ( )

PROGRAMMER SPECS:
Hard range for year is 1870-1995 for residents if round = 1; 1870-1996 for admissions if round = 2,3.
Perform hard range edit to ensure that Date of Birth in RH9 is before SAD; if error, display message: “Date of birth must be before {SAD}. Please re-enter.”

If year of birth is DK or RF, go to RH10. Otherwise, go to BOX RH9A.
Approximately how old is/was {SP}?

APPROXIMATE AGE IN YEARS ( )

PROGRAMMER SPECS:
Hard range is 0-125.

<table>

PROGRAMMER SPECS:
Disallow DK if current place is a facility unit, and display error message "DK not allowed. Current stay is a facility stay."
BOX
RH10

If coming from RH11A and RH11A is YES, or coming from RH11B and RH11B is YES, or coming from RH12 and RH12 is YES, then:

If SP is alive or vital status is not known, then:
- If the SP is sampled in the current round in the current facility and Round 1=(CR), go to BOX RH26.
- Else, if the SP is sampled in the current round in the current facility and Round = 2, 3 (F2, F3), go to BOX RH27.
- Else, if the SP is a live continuing resident, still in the facility at the end of the previous round reference period or readmitted, go to BOX RH27.
- Otherwise, (this is the first RH for this transfer SP in this facility), go to BOX RH26.

Else, if the SP is deceased, then go to RH12A.

Else, if coming from RH11A and RH11A is -8 (DK) or -7 (RF), or coming from RH11B and RH11B is -8 (DK) or -7 (RF), or coming from RH12 and RH12 is -8 (DK) or -7 (RF), then:
- If the SP is alive or vital status is not known, then go to RH12B.
- Else, if the SP is deceased, then go to RH12A.

RH12A

Was (she/he) in {CURRENT PLACE} when (she/he) died on {DATE OF DEATH} or somewhere else?

IN {CURRENT PLACE} ................................................................. 1 (BOX RH25)
SOMEBODY ELSE ................................................................. 0 (RH13)
DK ................................................................. -8 (BOX RH25)
RF ................................................................. -7 (BOX RH25)

PROGRAMMER SPECS:
If "1", "-8", or "-7", set stay end date to end of reference period.
**RH12B**

Is (she/he) still at (CURRENT PLACE)?

BOX RH25

If coming through timeline directly from RH12A or RH12B, and this is a transfer SP (coming from RH1PRE) or a readmitted SP (coming from RH2PRE1) or SP sampled in this facility in this round and round = 1, go to BOX RH26.
If coming through timeline directly from RH12A or RH12B, and SP is not a transfer SP and not a readmitted SP (SP is a continuing resident still in this facility at the end of previous round reference period or SP sampled in this facility in this round), or SP readmitted this round, go to BOX RH27.
Otherwise, go to RH12.

RH39 - RH42 omitted.
| BOX RH26 | If the SP is sampled in the current round in the current facility (CR), go to RH43PRE. Else, if this is a transfer SP, compare TAD to admission date reported by previous source. If TAD is later than admission date reported by previous source, go to RH43PRE. Otherwise, go to BOX RH27. |
PRE-STAY ITEMS

RH43PRE
If SP was sampled in this facility in this round, display SAD UNIT AND SAD. Otherwise (SP is a transfer or readmitted SP), display TADUNIT and TAD.

Now, I would like to ask you about the places where {SP} stayed before {she/he} came to {FACILITY/SAD/TAD UNIT} on {SAD/TAD} including staying in a hospital.

PRESS ENTER TO CONTINUE. (RH44)

PROGRAMMER SPECS:
Disallow CTRL/E on RH43PRE.

BOX RH26A
If SP sampled in this facility in this round (CR,F2,F3):
   If current stay includes 1/1/96 or is Shift/5, and a community stay is reported in pre-stay (prior to SAD), go to RH47.
   Else, if current stay year started or ended prior to 1/1/96 or is Shift/5 and is a community stay, go to RH47.
   Otherwise, go to RH44.
Else, if SP is transfer SP:
   If current stay includes admission date reported by previous source or Shift/5, go to BOX RH27.
   Otherwise, go to RH44.

RH44
On the first time RH44 is asked for this SP, display:
   {FACILITY} if facility has no special care or affiliated units, {SAD UNIT} if there are facility units and SP was sampled in this facility in this round, or {TAD UNIT} if there are facility units and SP is a transfer or readmitted SP.
   {SAD} if SP was sampled in this facility in this round, or {TAD} if SP was a transfer or readmitted SP.
On subsequent times RH44 is asked for this SP, display {PLACE FROM RH21} and {DATE FROM RH44A}.
Display current Timeline.

RH44
Do you know where {SP} stayed immediately before {she/he} came to {FACILITY/SAD UNIT/TAD UNIT/PLACE FROM RH21} on {SAD/TAD/DATE FROM RH44A}?

   YES ........................................... 1 (RH21)
   NO ............................................ 0 (RH45)

PROGRAMMER SPECS:
Disallow DK and RF. If DK or RF entered, display message: "IF RESPONDENT DOESN'T KNOW OR REFUSES, CODE NO."
RH44A
Display current Timeline/Stay Roster.

RH44A

When did (she/he) start staying at {PLACE NAME FROM RH21}?
PROBE FOR YEAR.
IF R NEVER WILL KNOW YEAR, ENTER SHIFT/5 IN MONTH.

MONTH ( ) DAY ( ) YEAR 19( ) (BOX RH26B)

PROGRAMMER SPECS:
Hard range for year: 1900-today.
For SPs sampled in this facility in this round, if date entered is on or after the SAD, display message "Date must be before {SAD}. Please re-enter."

Else, for transfer SPs, if date entered is on or after the TAD, display message "Date must be before {TAD}. Please re-enter."

Else, for all SPs, if date entered is after earliest known or partially known start date, display message: "Date must not be after or the same as {MOST RECENT KNOWN OR PARTIALLY KNOWN START DATE}. Please re-enter."

For instance, if the previous start date is 3/1, the current start date must not be on or after 3/1. If the previous start date is DK/DK, and the start date before that is 2/15, the current start date must not be on or after 2/15. If the previous start date is 3/DK, and the start date before that is DK/DK, and the start date before that is 3/8, then the current start date must not be on or before 3/8.

Else, for all SPs, if date is after date of birth, display hard range error message: "Date must be on or after date of birth ({mm/dd/yy}). Please re-enter."

For SPs sampled in this facility in this round and round = 2 or 3, if eligible sample facility unit is selected and the start date of the stay is before 1/1/96 and the end date of the stay is on or after 1/1/96, classify as SE and go to RH5.

For SPs sampled in this facility in this round and round = 3, if eligible sample facility unit is selected and the start date is between 1/1/96 and 6/30/96 inclusive, classify as SE and go to RH5.

Else, go to BOX RH26A.

RH45

Please tell me the name and title of someone in {FACILITY/SAD UNIT/TAD UNIT} who could give me that information.

RECORD RESPONDENT INFORMATION ON PAPER FROG.

PRESS ENTER TO CONTINUE.
RH46
Display earliest non-missing date of admission to eligible sample facility unit. If SP is a transfer SP, go to BOX RH27.

NHPI LOOKUP

BOX RH27
All SPs come through this box after timeline data is collected to search flagged places on the NHPI. If the place was searched in Round 1, no NHPI needs to be done; only places newly identified after Round 1 are flagged for searching the NHPI. Current residents, except those classified as "sampling error," come through this box after timeline and pre-timeline data is collected; if places are flagged for searching, the NHPI is searched (NHPI PRE), otherwise timeline data collection is done (RHEND). Admissions, except those classified as "sampling error" come through this box after pre-stay data is collected to search places flagged. If there are places flagged, the NHPI is searched (NHPI PRE); otherwise the eligibility algorithm is run (BOX RH29A). Admissions classified as eligible come through this box after timeline data is collected (SAD-RD EOR); if places are flagged for searching, the NHPI is searched (NHPI PRE), otherwise timeline data collection is done (RHEND).

| BOX RH27 | If coming from pre-stay and SP was sampled in this facility in this round and round is 2 or 3 and no places to look up to determine eligibility, go to BOX RH29A. Else, if there are no places to search on the NHPI, go to BOX RH31 (tracing contact). Otherwise, go to LOOKPRE. |

NHPI PRE
Display number of places for this SP with flag set to search NHPI. If that number is 1, display "place"; otherwise, display "places."

LOOKPRE
Now I need to look up (NUMBER) {place/places} you told me about.
PRESS ENTER TO CONTINUE.

| BOX RH28 | Call LOOKUP module with: place: next place flagged to search NHPI directory: NHPI |

| BOX RH29 | Go to BOX RH27. |
Design note: This box determines eligibility for Round 2 and 3 First Admits.
Recalculate and store final SAD.
Initially set the SP's eligibility status to "EF".
Start with the SAD stay and move backward in time through the stays until you
encounter a stay with a start date prior to 1/1/96, or until the SP has been
determined to be an ineligible First Admit.

For each stay:
If the place was not flagged to search on the NHPI, or the AHA indicates no SNF wing,
or the place is a unit of the SF, go to the next stay.
Else, if the place was not found on the NHPI (NHPI Lookup return code "2"), go to the
next stay.
Else, if the place was found on the frame (i.e., either NHPI Lookup return code "1" OR
AHA Lookup return code "1" and AHA flag set indicating the hospital was also on
the NHPI), then check if any of the following three conditions are true:
1. If RH22 is 1 (Nursing Home), and RH27 is 1 (Yes), -7 (Refused) or -8 (DK)...
   OR
2. If RH22 is 2 (Retirement Center) or 3 (CCRC), and RH27 is 1 (Yes)...
   OR
3. If RH22 = 4 (Hospital), and RH25 is 1 (Yes)...
   ...then change the SP eligibility code to "IF", stop looking through the stays,
   and go to RH5.
Else if, not enough information to search the place on the NHPI (NHPI Lookup return
code "3"), and RH22 is 1 (Nursing Home), and RH27 is 1 (Yes), -7 (Refused) or -8
(DK), then set the SP eligibility code to "PF" and continue checking stays.
Else, if not enough information to search the place on the NHPI (NHPI Lookup return
code "3"), and any of the following two conditions are true:
1. RH22 is 2 (Retirement Center) or 3 (CCRC), and RH27 is 1 (Yes)...
   OR
2. If RH22 = 4 (Hospital), and RH25 is 1 (Yes)...
   ...then set the SP eligibility code to "PF" and continue checking stays.

Design note: The pre-stay must reach back -- unambiguously -- to 1/1/96. If the pre-
stay does not extend to 1/1/96, or it is not clear that the pre-stay extends to 1/1/96,
then the SP is a PF.

TRACING CONTACT

| BOX RH31 | If round = 1, and SP is alive and not a resident of an eligible or ineligible LTC unit of facility, go to RH48. Otherwise, go to BOX RH32. |

RH48
For (DISCHARGE PLACE), display the place to which SP was most recently discharged.

Earlier you told me {SP} had been discharged to (DISCHARGE PLACE).
Please tell me the name, address, and telephone number of someone we could contact to keep track of (SP) at (DISCHARGE PLACE).

CONTACT NAME
STREET ADDRESS
CITY, STATE, ZIP CODE
(AREA CODE) TELEPHONE NUMBER

PROGRAMMER SPEC:
If DK or RF entered in contract name field go to BOX RH32, otherwise go to RH49.
If coming from pre-stay, display "lived." Display as choice list, with categories for "DON’T KNOW" and "REFUSED" at bottom of list.

What is the relationship of (CONTACT NAME FROM RH48) to (SP)?

SELECT ONE.

1. SP
2. SPOUSE
3. DAUGHTER
4. SON
5. MOTHER
6. FATHER
7. SISTER
8. BROTHER
9. DAUGHTER-IN-LAW
10. SON-IN-LAW
11. GRANDDAUGHTER
12. GRANDSON
13. NIECE
14. NEPHEW
15. FRIEND/NEIGHBOR
16. NURSE/NURSE’S AIDE
17. BOARDER
18. GUARDIAN
91. OTHER FEMALE RELATIVE, SPECIFY
92. OTHER MALE RELATIVE, SPECIFY
93. OTHER NONRELATIVE, SPECIFY
-8. DK
-7. RF

Design note: This box calculates SAD (if necessary), KAD and IAD. All eligible SPs come through this box. Current round admission came through this box twice - once after Pre-stay and again after Timeline.

1. If SP sampled in this round and round = 1, go to #3 below. Else, if SP sampled in this round and round = 2 or 3 and coming from pre-stay, go to #2 below. Otherwise, go to #5 below.

2. Recalculate SAD. Set temporary SAD to SAD. Moving backward in time from the SAD, if there is another stay in an eligible SF unit that began on or after 1/1/96 and is a non-missing date, set temporary SAD to that date. When there are no earlier stays that began on or after 1/1/96, set SAD to the temporary SAD.

3. Calculate KAD. Set temporary KAD to SAD. Moving backward in time from SAD, if there is another stay at an eligible unit of this facility with ONLY hospital stays <60 days intervening, set temporary KAD to that eligible facility unit admit date if it is non-missing, and repeat. When there are no earlier stays at an eligible unit of this facility interrupted ONLY by hospital stays of <60 days, then set KAD equal to the temporary KAD.

4. Calculate IAD. Set temporary IAD to KAD. Moving backward in time from KAD, if there is another stay at an eligible LTC with ONLY hospital stays of <60 days intervening, set temporary IAD to that eligible LTC admit date if it’s non-missing, and repeat. When there are no earlier eligible LTC stays interrupted ONLY by hospital stays of <60 days, then set IAD equal to the temporary IAD. Go to RH11B.

5. Go to BOX RH33.
| BOX RH33 | 1. Determine SP eligibility for CRR. If this SP is a CR sampled in this facility last round, or an FA sampled in this facility this round, go to step 2. Else, go to RHEND.  
2. Determine facility CRR status: If facility refused to furnish SP names or if facility refused to identify community contacts (FG4 = -7 (REFUSED)), go to RHEND. Else, go to RH50. |

**FUNCTIONAL SPECIFICATIONS FOR THE DIRECTORY LOOKUP**

The directory lookup is designed as a standalone module that can be called from the Facility Questionnaire, the Residence History, or any other instrument that needs to search for a place on a directory such as the HPI or a hospital list.

**Input.** The directory lookup module requires a place name to look up, and the name of the directory.

**Output.** The directory lookup module returns to the calling instrument:

1. A return code signifying the outcome of the directory lookup.
2. If the place was found, the name, address, city, state, zip code, and phone number.
3. If the place was found, an ID number that uniquely identifies the place on the directory. For the NHPI directory, this means the NHPI ID. For the hospital directory, this means the AHA ID. The hospital directory must also return variables indicating whether the hospital had a SNF wing, and whether this AHA entry was also stored on the NHPI.

The directory lookup module returns to the calling instrument the required information from the directory, and a return code signifying the outcome of the lookup. Required information includes the name, street address, city, state, zip code, telephone number up to two identifying numbers.

The return value has the following codes:

1 = The directory lookup produced a match acceptable to the interviewer.

2 = The directory lookup produced no acceptable matches, and the interviewer entered the name and address information.

3 = The directory lookup produced no acceptable matches, and the interviewer was unable to enter the name and address information.

**Processing.**

1. Interviewer enters search criteria of choice (pressing enter through fields not to be used), including place name, address, city, state, zip code, or phone number. Interviewer may use wildcards in the place name.

2. The directory is searched for matches to those criteria. For testing and training purposes, the NHPI and AHA directories contain "dummy" entries. If the current case is a testing or training case, search for all matches (including the "dummy" entries). Otherwise, search for matches only with non-dummy directory entries.

3. If any matches, present matches in a choice list. If interviewer selects, return required information (and return code = 1) to calling program.

4. Otherwise, if there are no matches or if the interviewer does not want to select a place from the matched places, offer option to respecify search criteria and repeat search, or to add place, or to mark as having insufficient information.
[Earlier you told me about some long-term care places.]
Now I’d like to search for (PLACE NAME) on the list in my computer.

**ON WHICH FIELDS DO YOU WISH TO SEARCH THE NATIONAL HEALTH PROVIDER INVENTORY?**
PRESS F2 FOR ALSO KNOWN AS NAMES.
ENTER FIELDS TO SEARCH.

PLACE NAME: ______________________________
ADDRESS: ______________________________
CITY: ______________________________
STATE: ___
ZIP CODE: ______
PHONE: (_____) ______________________

PRESS F1 FOR STATE ABBREVIATIONS.

**PROGRAMMER SPECS:**
Disallow hyphens in the phone number field.
Disallow DK and RF in any field.
Interviewer must enter the state abbreviation; if interviewer attempts to enter a missing or invalid state abbreviation, display message: “You must enter a valid state abbreviation.” In addition to the state, there must be at least one other search criterion specified; if no other criterion specified, display message: “You must specify one search field other than state. Please re-enter.”

**LOOK2**
For those fields entered in LOOK1, display the search criteria as entered by the interviewer. Otherwise, display blank fields.

THE FOLLOWING INFORMATION DID NOT MATCH ANY ENTRIES IN THE NATIONAL HEALTH PROVIDER INVENTORY.

PLACE NAME: {CRITERION FROM LOOK1}
ADDRESS: {CRITERION FROM LOOK1}
CITY: {CRITERION FROM LOOK1}
STATE: {CRITERION FROM LOOK1}
ZIP CODE: {CRITERION FROM LOOK1}
PHONE: {CRITERION FROM LOOK1}

SEARCH AGAIN .................................................. 1 (LOOK1)
COLLECT ADDRESS INFORMATION FOR THIS PLACE .................... 2 (LOOK3)
UNABLE TO COLLECT ADDRESS INFORMATION FOR THIS PLACE .......... 3 (BOX LOOKUP5)

**PROGRAMMER SPECS:**
Disallow DK and RF.
LOOK3
Display the search criteria as entered by the interviewer in LOOK3; display blank if no criterion entered for a particular field. In question text:

If any element of address AND any element of phone number not entered in LOOK1, display "Please tell me" and "address and phone number."
Else if any element of address not entered in LOOK1, display "Please tell me" and "address."
Else if any element of phone number not entered in LOOK1, display "Please tell me" and "phone number."
Otherwise, display "Let me verify" and "address and phone number."

| PLACE NAME | {CRITERION FROM LOOK1/______________________} |
| ADDRESS     | {CRITERION FROM LOOK1/______________________} |
| CITY        | {CRITERION FROM LOOK1/______________________} |
| STATE       | {CRITERION FROM LOOK1/______________________} |
| ZIP CODE    | {CRITERION FROM LOOK1/______________________} |
| PHONE       | {CRITERION FROM LOOK1/______________________} |

IS THIS CORRECT?

NO ............................................ 0
YES ........................................... 1

PRESS F1 FOR STATE ABBREVIATIONS.

PROGRAMMER SPECS:
Allow the interviewer to press <Enter> to accept a previously-entered field; if <Enter> attempted on blank field, display message "You must enter a value for this field" and return to same item. When all search fields have been entered, display new values, remove input fields and verify if correct. If yes, go to BOX LOOK3. Otherwise, show new input fields under each of the search items and repeat LOOK3.
Disallow hyphens in phone number field.

<table>
<thead>
<tr>
<th>BOX LOOKUP3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Set return code to 2 to indicate place was searched on LOOK1, not found, and added. The data entered in LOOK3 will be returned to the calling module. Go to BOX LOOKUP6.</td>
</tr>
</tbody>
</table>
LOOK4
In question text, display number of matches for "[NUMBER]". Then display the original place name as sent over from the calling module. Display the place names of all directory matches in a matrix (one row for each matched place name). Below this matrix, display the full name, address, and phone number for the place the highlight bar is currently on.

LOOK4

PLACE: {ORIGINAL PLACE NAME}

THE DIRECTORY HAS Matched YOUR SEARCH WITH THE FOLLOWING {NUMBER} PLACES:

PRESS F2 FOR ALSO KNOWN AS NAMES.

TO SELECT A PLACE, USE ARROW KEYS, PRESS ENTER, PRESS ESC. IF NONE OF THESE IS THE CORRECT PLACE, PRESS ESC.

(LIST OF MATCHED PLACES IN MATRIX)

PLACE NAME : {PLACE}
ADDRESS : {ADDRESS}
CITY : {CITY}
STATE : {STATE}
ZIP CODE : {ZIP}
PHONE : ({AREA CODE} {PHONE})

PROGRAMMER SPECS:
If matched place is selected (<Enter> pressed), go to BOX LOOK4. Otherwise (<Escape> pressed), overlay categories:

SEARCH AGAIN .................................................. 1 (LOOK1)
COLLECT ADDITIONAL ADDRESS INFORMATION FOR THIS PLACE .......... 2 (LOOK3)
UNABLE TO COLLECT ADDRESS INFORMATION FOR THIS PLACE ......... 3 (BOX LOOKUP5)

Disallow DK and RF.

BOX LOOKUP4
Set return code to 1 to indicate place name searched and found. The data selected in LOOK4 will be returned to the calling module. Go to BOX LOOKUP6.

BOX LOOKUP5
Set return code to 3 to indicate place has insufficient information to search or add. No other data will be returned to calling module. Go to BOX LOOKUP6.

BOX LOOKUP6
RETURN TO CALLING MODULE.
MISSING DATA RETRIEVAL

OVERALL PROGRAMMING SPECIFICATIONS:
All of the overall programming specifications specified in the RH Questionnaire are applicable in the RH Missing Data Module.

After entering a response to the last screen in RH missing data, the cursor returns to the Navigate Screen if no more missing data. Otherwise, return to RH_MISS.

If RH6 = -8 or -7, collect sex;
If RH7 = -8 or -7, collect vital status;
If RH8 = -8 or -7, collect date of death;
If RH9 = -8 or -7 in year, collect date of birth and RH10 = DK (-8) or RF (-7);
If SP sampled in this facility in this round and round = 1 (CR), and looking backwards from SAD stay, RH44 (prior place) = NO (0) or [both RH44A date is DK (-7) or RF (-8) and not a community stay], collect missing prestay data only if SAD is between 1/1/94 and 12/31/95;

Design Note: The next paragraph is designed to use the same logic as BOX RHMD26A to determine whether or not to collect any more pre-stay data in Missing Data mode.

If SP sampled in this facility in this round and round = 2 or 3 (F2, F3): Start with the SAD stay and move backward in time through the stays until you determine that missing data is not needed.
If the current stay includes 1/1/96 or shift/5, and a community stay is reported in pre-stay (prior to SAD), missing data is not needed. Else, if current stay year started or ended prior to 1/1/96 or is shift/5, and is a community stay, missing data is not needed. If there are more stays to evaluate, go to next previous stay. Otherwise, collect missing pre-stay data.

Timeline:
If RH13 is missing data, collect missing data.

---

RH_MISS
MISSING DATA

On what date did (SP) die?

IF RESPONDENT ANSWERS "DK," PROBE: "Do you know what month (SP) died?"

ENTER SHIFT/5 IF RESPONDENT NEVER WILL KNOW.

MONTH ( )DAY ( )YEAR 1996

PROGRAMMER SPECS:

If SP sampled in this round in this facility and round = 2, 3 and date entered is before SAD, display message: “Date must be on or after (SAD). Please re-enter.”

If SP sampled in this facility in this round and round = 1, if date entered is before 1/1/96, display message: “Date must be on or after January 1, 1996. Please re-enter.”

Else if SP was a live, continuing resident still in the facility at the end of the previous round reference period, and date entered is before the end of previous round reference period, display message: “Date must be on or after (PREVIOUS ROUND END OF REFERENCE PERIOD). Please re-enter.”

Else if SP is a transfer or readmitted SP, and date entered is before the TAD, display message: “Date must be on or after (TAD). Please re-enter.”

Else, for all SPs, if Date of Birth is known, perform hard range edit to ensure that Date of Death in RH8 is on or after Date of Birth; if error, display message: “Date of death must be on or after date of birth (mm/dd/yy). Please re-enter.”

If day is DK or RF, set Date of Death to last day of month. Set flag for retrieval in community. Go to BOX RHMD7.

SPs sampled in the current round in the current facility go to BOX RHMD8. Others go to BOX RHMD9.

If date of birth DK or RF go to RHMD9; otherwise, go to BOX RHMD9A.
RHMD9

What (is/was) {SP’s} date of birth?

ENTER A 4-DIGIT YEAR.

MONTH ( ) DAY ( ) YEAR ( )

PROGRAMMER SPECS:
Hard range for year is 1870-1995 for residents if round = 1; 1870-1996 for admissions if round = 2,3.

BOX RHMD9
If year of birth is DK or RF, go to RHMD10. Otherwise, go to BOX RHMD9A.

RHMD10

Approximately how old (is/was) {SP}?

ENTER SHIFT/5 IF RESPONDENT NEVER WILL KNOW.

APPROXIMATE AGE IN YEARS ( )

PROGRAMMER SPECS:
Hard range is 0-125.

BOX RHMD9A
If any remaining dates are missing from pre-stay, or any remaining stays have prior place = NO, go to BOX RHMD10.
Else, if any remaining dates are missing from timeline, go to RHMD13.
If any missing data return to RH_MISS.
Else, go to RHMDEND.
PRE-STAY ITEMS

BOX RHMD10

Pre-stay. Start with SAD. Check for stay prior to SAD. If no stay prior to SAD, go to RHMD43PRE. If stay prior to SAD, loop backwards examining stay dates. If date missing go to RHMD44A and collect date. Else go to BOX RHMD26A.

RH43PRE

If SP was sampled in this facility in this round, display SAD UNIT and SAD.

RHMD43PRE

Now, I would like to ask you about the places where {SP} stayed before {she/he} came to {SAD UNIT} on {SAD} including staying in a hospital.

PRESS ENTER TO CONTINUE. (RHMD44)

BOX RHMD26A

If SP sampled in this facility in this round (CR,F2,F3):
If current stay includes 1/1/96 or Shift/5 and a community stay is reported in pre-stay (prior to SAD), go to RHMD47.
Else, if current stay year started or ended prior to 1/1/96 or Shift/5 and is a community stay, go to RHMD47.
Otherwise, go to RHMD44.
Else, if SP is transfer SP:
If current stay includes admission date reported by previous source or Shift/5, go to BOX RHMD27A.
Otherwise, go to RHMD44.

RHMD44

On the first time RHMD44 is asked for this SP, display:
(FACILITY) if facility has no special care or affiliated units, (SAD UNIT) if there are facility units and SP was sampled in this facility in this round.
(SAD) if SP was sampled in this facility in this round.
On subsequent times RHMD44 is asked for this SP, display {PLACE FROM RH21} and {DATE FROM RH44A}.

Display current Timeline.

RHMD44

Do you know where {SP} stayed immediately before {she/he} came to (FACILITY/SAD UNIT/PLACE FROM RH21) on (SAD/DATE FROM RH44A)?

ENTER SHIFT/5 IF RESPONDENT NEVER WILL KNOW. (BOX RHMD27A)

YES ........................................... 1 (RH21)
NO ............................................ 0 (RHMD45)

PROGRAMMER SPECS:
Disallow DK and RF. If DK or RF entered, display message: "IF RESPONDENT DOESN'T KNOW OR REFUSES, CODE NO."
RHMD44A
Display current Timeline/Stay Roster. If coming from RH21A, display "ENTER COMPLETE DATE FROM ADMISSIONS LIST" as an interviewer instruction.

RHMD44A

When did (she/he) start staying at (PLACE NAME FROM RH21)?
PROBE FOR YEAR.
IF R NEVER WILL KNOW YEAR, ENTER SHIFT/5 IN MONTH.

MONTH ( ) DAY ( ) YEAR 19( ) (BOX RHMD10)

PROGRAMMER SPECS:
For SPs sampled in this facility in this round, if date entered is on or after the SAD, display message "Date must be before {SAD}. Please re-enter."

Else, for transfer SPs, if date entered is on or after the TAD, display message "Date must be before {TAD}. Please re-enter."

Else, for all SPs, if date entered is after earliest known or partially known start date, display message: "Date must not be after {MOST RECENT KNOWN OR PARTIALLY KNOWN START DATE}. Please re-enter."

For instance, if the previous start date is 3/1, the current start date must not be on or after 3/1. If the previous start date is DK/DK, and the start date before that is 2/15, the current start date must not be on or after 2/15. If the previous start date is 3/DK, and the start date before that is DK/DK, and the start date before that is 3/8, then the current start date must not be on or before 3/8.

Else, for all SPs, if date is after date of birth, display hard range error message: "Date must be on or after date of birth (mm/dd/yy). Please re-enter."

For SPs sampled in this facility in this round and round = 3, if eligible sample facility unit is selected and the start date of the stay is before 1/1/96 or between 1/1/96 and 6/30/96 inclusive OR the end date of the stay is between 1/1/96 and 6/30/96 inclusive, classify as SE and go to BOX RH27A.

RHMD45

Please tell me the name and title of someone in (FACILITY) who could give me that information.

RECORD RESPONDENT INFORMATION ON PAPER FROG.

PRESS ENTER TO CONTINUE. (BOX RHMD27A)
National Study Facility Residence History, Version 3.1, page 49

BOX RH26B omitted.

RHMD47
Display the place name and the end date for earliest community stay collected in pre-stay. Display "then" if SHIFT/5 entered for end date of community stay.

RHMD47
Please tell me the city, state, and zip code for (PLACE NAME) where (she/he) was living on (END DATE OF COMMUNITY STAY/then).

PROGRAMMER SPECS:
For SPs sampled in this facility in this round and round = 2,3, if date entered is before the SAD, display message: “Date must be on or after (SAD). Please re-enter.”

For SPs sampled in this facility in this round and round = 1, if date entered is before 1/1/96, display message: “Date must be on or after January 1, 1996. Please re-enter.”

For continuing SPs still in the facility at the end of the previous round reference period, if date entered is before the end of the previous round reference end date, display message: “Date must be on or after (END OF PREVIOUS ROUND REFERENCE PERIOD). Please re-enter.”

For transfer SPs receiving the first RH in this facility, if date entered is before TAD, display the message: “Date entered must be on or after (TAD). Please re-enter.”

Else, for all SPs, if date entered is after end of current round reference period, display message: “Date cannot be after (CURRENT ROUND END OF REFERENCE PERIOD). Please re-enter.”

Else, for all SPs, if date entered is on or before most recent known or partially known start date collected in this round, display message: “Date must be after (MOST RECENT KNOWN OR PARTIALLY KNOWN START DATE). Please re-enter.”

For instance, if the previous start date is 5/15, the current start date must not be on or before 5/15. If the previous start date is DK/DK, and the start date before that is 5/8, then the current start date must not be on or before 5/8. If the previous start date is 5/DK, and the start date before that is DK/DK, and the start date before that is 5/2, then the current start date must not be on or before 5/2.

Else, if CURRENT PLACE is hospital and stay is 60 days or longer, display soft range error message: “Unlikely Response. Hospital stay is {number of days} days. Please verify and re-enter.”

<table>
<thead>
<tr>

About how many nights did (she/he) spend there?
ENTER SHIFT/5 IF RESPONDENT NEVER WILL KNOW.

# OF NIGHTS ( ) (BOX RHMD9A)

PROGRAMMER SPECS:
If RH14 is greater than the maximum allowable number of nights, as calculated from the partial data in RH13 and the current start date, display message "Number is greater than difference between (current start date) and (RH13 date). Please reenter or back up to change dates."

Else, if RH14 is less than minimum allowable number of nights, as calculated from the partial data in RH13 and the current start date, display message "Number is less than difference between (current start date) and (RH13 date). Please re-enter or back up to change dates."

If RH14 is neither DK nor RF, calculate the date for RH13, and perform the following edits.

For SPs sampled in this facility in this round, if date entered is before the SAD, display message: “Date must be on or after (SAD). Please re-enter.”

For continuing SPs still in the facility at the previous round end of reference period, if date entered is before the end of the previous round reference end date, display message: "Date must be on or after (END OF PREVIOUS ROUND REFERENCE PERIOD). Please re-enter."

For transfer SPs receiving the first RH in this facility, or for readmitted SPs, if date entered is before TAD, display the message: “Date entered must be on or after (TAD). Please re-enter.”

Else, for all SPs, if date entered is after end of current round reference period, display message: “Date cannot be after (CURRENT ROUND END OF REFERENCE PERIOD). Please re-enter.”

Else, for all SPs, if date entered is on or before most recent known or partially known start date collected in this round, display message: “Date must be after (MOST RECENT KNOWN OR PARTIALLY KNOWN START DATE). Please re-enter.”

For instance, if the previous start date is 5/15, the current start date must not be on or before 5/15. If the previous start date is DK/DK, and the start date before that is 5/8, then the current start date must not be on or before 5/8. If the previous start date is 5/DK, and the start date before that is DK/DK, and the start date before that is 5/2, then the current start date must not be on or before 5/2.

YOU HAVE COMPLETED RESIDENCE HISTORY FOR THIS SP. THANK RESPONDENT AND PRESS ENTER TO RETURN TO THE NAVIGATION SCREEN.

PRESS ENTER TO CONTINUE.
OTHER NURSING HOME OR REHABILITATION CENTER:
Nursing homes are licensed or certified facilities that provide nursing services 24 hours a day to the residents. Rehabilitation centers provide skilled nursing care or rehabilitation services and other related health services.

A RESIDENTIAL CARE FACILITY:
Residential care facilities or apartment buildings offer residents help with activities, such as bathing and dressing, but do not provide 24-hour nursing services. (Some residents at a residential care facility may not require such assistance, but it must be available to them.) These facilities are sometimes called assisted-living communities, personal care homes, board and care homes, or domiciliary homes.

CCRC OR RETIREMENT CENTER OR HOME:
CCRC and retirement centers or homes may have nursing home facilities on a campus along with other housing and services, such as apartments, board and care services, and often a variety of community-based long-term care services.

### RH22
Residential care facilities offer help with activities such as bathing and dressing but do not provide 24-hour nursing services. Include assisted living communities, board and care homes, domiciliary homes, group homes, personal care homes, and homes for persons with mental illness or retardation.

### RH31
Services provided by an agency or paid independent provider who comes to the person’s home to provide medical care, personal care, or homemaker services due to a physical or mental health limitation or impairment. These services may be provided by nurses, therapists, homemakers, or home health aides.

### RH36
A formal discharge is defined by the facility, i.e., whatever the facility defines as a formal discharge is a formal discharge. It may mean that the person is not charged even though the bed is held.

In some states, Medicaid requires a person be formally discharged whenever she goes to a hospital. Medicaid may reimburse the nursing home, usually an amount lower than the normal per diem rate during a hospital stay. There is usually a maximum number of days that Medicaid will reimburse, and this varies by state.

Subject: Revised Rules for First Admission Eligibility Determination

This memo describes the rules for making eligibility determinations for the first admissions sample ("EF", "IF", or "PF") when missing dates are present in the residence history. For the most part, these rules were developed through a collaborative process at our meeting on 1/23/95 and described in my earlier memo of 1/31/96, No. 2-96-1034. Since then, however, Rick suggested a case (described in an attached e-mail) for which the rules developed at that meeting do not work well. I have added a new rule to cover this case.

Prior Stay in an Eligible Facility

Rule 1: If an SP resided in an eligible facility during the reference year prior to the SAD, then the SP is ineligible for the First Admissions sample and should be given an IF designation, regardless of whether dates are missing. However, if the year is missing from the end date, then a “PF” designation should be given.

Stays with Missing Month

SPs not made "IF" or "PF" by Rule 1 should follow Rule 2:

Rule 2: A missing month in either the start or end date for any stay except the earliest stay of the reference year should result in a "PF" eligibility designation. In the earliest stay of the year, a missing month in either start or end date should result in a "PF" eligibility designation. A missing month in the end date of earliest stay of the year should result in a "PF" eligibility designation.

Unfortunately, Rule 2 lacks the simplicity of Rule 1. In fact, Rule 2 might be better formulated in three parts:

Rule 2: (a) A missing month in either the start or end date for any stay except the earliest stay of the reference year should result in a "PF" eligibility designation.
(b) In the earliest stay of the year, a missing month in either start or end date should result in a "PF" eligibility designation.
(c) A missing month in the end date of earliest stay of the year should result in a "PF" eligibility designation.

Cases where the Earliest Stay Begins after 1/1/96

SPs that are still "EF" after Rules 1 and 2 should follow Rule 3:

Rule 3: If the start date for the earliest stay of the year is known and falls on or after 1/1/96, then the SP should be given a "PF" eligibility designation.

Final Algorithm for Assigning First Admissions Eligibility

The algorithm for establishing first admissions sample eligibility should be as follows:

1. Assign the code "EF".
2. Apply Rule 1.
3. If the SP still has an "EF" after applying Rule 1, apply Rule 2a.
4. If the SP still has an "EF" after Rules 1 and 2a, apply Rule 2b.
5. If the SP still has an "EF" after Rules 1, 2a, and 2b, apply Rule 2c.
6. If the SP still has an "EF" after Rules 1, 2a, 2b, and 2c, apply Rule 3.
Specifications for Assigning Eligibility Codes

At the meeting, I volunteered to modify the text for the last paragraph of Box RH29A. As you can see, my suggested text closely follows the text of this memo:

There are two rules for assigning eligibility codes:

Rule 1: If an SP resided in an eligible facility during the reference year prior to the SAD, then the SP is ineligible for the First Admissions sample and should be given an "IF" designation, regardless of whether dates are missing. If the year is missing from the end date, then a "PF" designation should be given.

Rule 2: (a) A missing month in either the start or end date for any stay except the earliest stay of the reference year should result in a "PF" eligibility designation.  
(b) In the earliest stay of the year, a missing month in either start or end date should result in a "PF" eligibility designation.  
(c) A missing month in the end date of earliest stay of the year should result in a "PF" eligibility designation.

Rule 3: If the start date for the earliest stay of the year is known and falls on or after 1/1/96, then the SP should be given a "PF" eligibility designation.

To apply these rules, follow these steps:

1. Assign the code "EF".
2. Apply Rule 1.
3. If the SP still has an "EF" after applying Rule 1, apply Rule 2a.
4. If the SP still has an "EF" after Rules 1 and 2a, apply Rule 2b.
5. If the SP still has an "EF" after Rules 1, 2a, and 2b, apply Rule 2c.
6. If the SP still has an "EF" after Rules 1, 2a, 2b, and 2c, apply Rule 3.
